Gunicorn

EDUCATION

B.E (EXTC) - SJ CET
College of Engineering,
Palghar (Mumbai
University).

WORK EXPERIENCE

Associate Developer - IT Carnelian Payments Networks

02/2023 - Present

Thane

Achievements/Tasks

- Paynet: Developed a flexible, secure, and scalable payment gateway for an innovative fintech startup, aligning with strategic goals and supporting future growth.
- nTrack: Trace and Track software tailored for pharmaceutical companies ensures end-to-end supply chain visibility, regulatory compliance, and operational efficiency.

Python Developer Adeo Distinction and Dimensions Pvt.Ltd.

12/2021 - 10/2022

Banglore

Achievements/Tasks

- CAMBOSS: Developed a Django-based web app that continuously monitors CCTV health, ensuring reliable camera functionality.
- Divyang: Created a job portal by Voice of Planet Foundation, enhancing global job opportunities for specially-abled individuals.

Programming Associate And Network Admin On My Own Technology Pvt.Ltd.

09/2019 - 09/2021

Andheri

Responsibilities/Acheivements

- Completed web development projects using Python or Javascript frameworks. Engaged in client interactions for requirement analysis, system upgrades, and debugging. Managed Azure and Gsuite portals, assisted in technical paper publication, contributed to an award-winning WRO project in Hungary, and gained experience in publishing and deploying projects.

PROJECTS

Construction Management Solution

- Crafted a project utilizing Angular, Express, Node.js, and PostgreSQL for a construction company. The project includes a dashboard showcasing ongoing project sites, machinery in operation, and inventory status.

E-Commerce website for Paints

- Created an e-commerce platform specializing in paints, cements, and various tools. The web application was developed using Django and hosted on an Ubuntu server with Nginx and Gunicorn. Key features include a user-friendly shopping cart, secure payment processing, and real-time inventory management.

4thPillar (News website)

- Developed and deployed a news website using Django, with deployment handled on an Nginx server. The project includes features like user dynamic content management, and an intuitive admin interface for seamless content updates. Optimized the site for performance and scalability.
