PROFESSIONAL PROFILE

I am an experienced Fullstack Developer with a proven track record of delivering innovative solutions. I specialize mostly in backend development using Node.js (Express) and relational databases like PostgreSQL and MySQL. I am skilled in building scalable and high-performance applications. I excel at working within cross-functional teams to deliver high-quality products. I am all about optimizing system performance, and implementing secure authentication mechanisms that enhance user engagement.

EDUCATION

- Web Development, Rolof Computer Academy (August 2022 – January 2023)
- Web Development, Zero to Mastery Academy (January 2022 – June 2022)
- BSc Petroleum Geoscience, Radford University College (August 2015 – September 2019)

EXPERIENCE

Backend Developer, Quantum Side Technologies, Remote, Nigeria (August 2024 – March 2025)

- Developed and maintained backend services using ExpressJs and relational databases.
- Implemented secure payment processing using both Flutterwave and Paystack.
- Managed user authentication, authorization, and role-based access control.
- Developed RESTful APIs for customer interactions, product management, and order processing.
- Optimized database queries and improved system performance.
- Currently leading backend development for **Update Room**, a social media mobile application.
- Building scalable APIs to support user interactions, content posting, and room-based discussions.
- Implementing real-time chat functionality using Firebase.
- Enhancing application security, performance, and scalability.

IT Officer, AMJU Unique MFB, Delta, Nigeria (August 2023 – January 2024)

- Provided technical support to end-users, addressing software-related issues promptly to ensure a seamless user experience.
- Conducted regular system audits to ensure compliance with industry standards and identified areas for improvement.
- Played a key role in system upgrades and updates, integrating the latest technologies to optimize performance.

Frontend Developer, GO3NET, Lagos, Nigeria (September 2022 – July 2023)

- Collaborated with UX/UI designers to ensure seamless user experience.
- Implemented SEO best practices to increase website traffic and visibility.
- Debugged and resolved issues related to frontend development.
- Participated in the agile development process and attended daily stand-up meetings.

CERTIFICATIONS

- Backend Developer – ALX Africa (2024)
- Backend Developer – DevCareer (2024)
- Web Developer – Rolof Computer Academy (2023)
- Frontend Developer – Terra Learning (2022)

PROJECTS

- **Update Room** – A social media app facilitating real-time interaction and location-based content sharing. Designed and built the backend architecture, ensuring scalability and efficiency. Integrated Firebase for chat functionalities and PostgreSQL for robust data storage.
- **SUFT** – An e-commerce platform specializing in bean bags. Designed and developed the backend system to handle product listings, order management, and customer interactions. Integrated both Flutterwave and Paystack as secure payment solutions. Ensured a seamless checkout process with optimized transaction handling and database performance.
- **Task Management System** – Developed a task-tracking system using Python, enabling users to efficiently manage their daily tasks. Implemented deadline tracking features, notifications, and an intuitive user interface to improve productivity and workflow management.
- **Nova Travels** – A visa facilitation and travel support web app. Built and deployed the frontend using Next.js, with a responsive blog system and dynamic content. Designed for fast-loading pages and strong SEO performance.
- **Consulink** – A multi-sector consulting firm's website. Implemented SEO features including canonical tags to ensure a clean UI and mobile responsiveness, Optimized for search engine indexing and visitor engagement.
- **CD Tech** – A corporate website for a technology firm. Built and maintained the frontend using React and Tailwind CSS. Focused on brand identity, section modularity, and responsiveness.
- **Ladicha Salon & Spa** – Implemented a polished front-end with responsive layout and custom styles, ensuring optimal display on desktops and mobiles. Integrated an EmailJS-powered contact form for client communication and booking requests. Collaborated closely with the client to refine UI design and content, improving user engagement and lead generation.
- **FEDTC** –Designed and developed both front-end and back-end. Created custom UI components and integrated a MySQL database for dynamic content. Implemented administrative features and ensured site responsiveness.
