Lochinvar Preventative Maintenance Kits: Every Tune-Up Part in One Box

Each kit bundles the gaskets, seals and ignition parts a typical annual tune-up calls for.

Heating Season Is Here

Heating season is here, and so is the busy stretch of boiler and water heater tune-ups.

You know how it goes. You open the unit, pull the burner and realize you need a gasket that isn't on the truck. Now it's a trip back to the counter, a second visit and a customer who waits longer than they should.

Lochinvar's preventative maintenance kits are built to cut down on those extra trips.

What Is a Preventative Maintenance Kit?

It's an OEM service package for Lochinvar boilers and water heaters. Each kit bundles the critical gaskets, seals and ignition components needed for an annual tune-up into one box, matched to the equipment it was built for.

Why Contractors Like Them

- **Less downtime.** The parts you need are on hand when the service is done.
- **Exact fit.** Genuine Lochinvar OEM parts, packaged for the right equipment family.
- **Time saved.** One kit instead of piecing together an order part by part.

Keep One on the Truck

Because a kit includes most of the service parts a tune-up calls for, you can keep one on the van or leave it at the jobsite for the next visit. When a part needs replacing, it's already there.

That means less time tracking down parts, fewer return trips and less downtime for your customer.

What's Typically Inside

- **Gaskets & seals** for proper sealing during routine service and part replacement.
- **Ignition components** commonly needed for scheduled maintenance.
- **Model-specific parts** such as sensors, fuses, hardware and filters. Contents vary by kit.

Find the Right Kit for the Job

HVAC #	LOCHINVAR #	FITS
476851	100308747	KHB / WHB boilers
474561	100308750	NKC / NKB boilers
476852	100320883	KB 400 boiler
479306	100320886	KB 601–801 boilers

KHB / WHB kit (100308747)

NKC / NKB kit (100308750)

Stocked and Ready

We keep select Lochinvar kits on our shelves, based on what contractors order most. Availability varies by region, so check with your local branch or Account Manager before you head over.

> **TUNE-UP TIP**
> *Before you load the van, check your schedule for the boiler models you'll see this week. Matching the kit to the model ahead of time is what turns a two-trip call into a one-trip call.*

Transformer, control, 120×24V 40VA 60Hz	100208230	1
Gasket, blower, 3-3/16″ × .094″ thick	100208101	1
Kit, tool bag, PM service kits	100162399	1

Get Ahead of the Rush

The best time to stock up is before the no-heat calls start stacking up. Grab a kit for the boilers you service most and make your next tune-up a one-trip job.

Not sure which kit fits? Contact your local HVAC Distributors branch or Account Manager. You can also search "maintenance kit" on lochinvar.com.
