

## Installation & Setup

- ◆ Install Docsify globally

```
npm i docsify-cli -g
```

- ◆ Initialize a new Docsify project

```
docsify init ./docs
```

- ◆ Start local server

```
docsify serve ./docs
```

## Project Structure

```
/docs  
|-- index.html  
|-- README.md  
|-- .nojekyll
```

## Core Configurations in index.html file

```
<script>  
window.$docsify = {  
  name: 'Your Site Name', // Title in sidebar  
  repo: 'https://github.com/your-repo', // GitHub link  
  themeColor: '#000000', // Primary color  
  loadSidebar: true, // Enable sidebar  
  loadNavbar: true, // Enable top nav  
  coverpage: true, // Enable cover page  
  search: 'auto' // Enable search  
};  
</script>
```

## Sidebar Navigation

- ◆ Create `_sidebar.md` in /docs
- ◆ Set `loadSidebar: true` in index.html file
- ◆ Add Link files/pages

```
- [Home](README.md)  
- [Guide](guide.md)  
- [Reference](reference.md)
```

## Navbar (Header)

- ◆ Create `_navbar.md` in /docs
- ◆ Set `loadNavbar: true` in index.html file
- ◆ Add Link files/pages

```
- [Home](README.md)  
- [Guide](guide.md)  
- [Reference](reference.md)
```

## Coverpage

- ◆ Create `_coverpage.md` in /docs
- ◆ Set `coverpage: true` in index.html file
- ◆ Customize your page

```
# My Docs  
> A lightweight Docsify site  
[Get Started](README.md)
```

## Themes

- ◆ **Vue.css (default)**
- ◆ **Buble.css**
- ◆ **Dark.css**
- ◆ **Pure.css**
