THE PROBLEM

What's Broken in Traditional Job Platforms?

- Resume keyword matching ignores real capability
- Job descriptions are vague and unrealistic
- Skilled candidates are filtered out unfairly
- Recruiters waste time screening unfit profiles
- Indian market skills and context are poorly represented

Reality Check:
Hiring fails not because of lack of talent, but because of poor matching logic.

SOLUTION OVERVIEW

Introducing Work Flow AI

Workflow AI is an AI-native job marketplace that connects talent and organizations using:

- **Measurable outcomes**
- **Verified skills**
- **Proof of real work**
- **AI-driven success prediction**

Core Idea:

“Show what you can deliver, not what you claim”

SECURITY & TRUST ARCHITECTURE

ARCH 01

- DOMPurify input sanitization (XSS prevention)
- No dangerouslySetInnerHTML usage
- Shell metacharacter filtering

ARCH 02

- Strict Content Security Policy (CSP)
- TypeScript strict mode
- No eval() or dynamic execution

ARCH 03

- Rate limiting to prevent abuse
- Strong URL & email validation

OUTCOME:
ENTERPRISE-GRADE SECURITY FROM DAY ONE.

TECHNOLOGY STACK & ARCHITECTURE

Modern, Scalable, AI-Ready

Frontend:

- React 18, TypeScript, Vite
- React Router 6

Backend & Auth:

- Supabase (real-time database)
- Clerk Authentication

AI & Utilities:

- Custom AI Matching Engine
- UUID for secure identifiers
- DOMPurify for sanitization

Design Philosophy:

Scalable, secure, and production-ready.
