PROJECTS

SOHAR BANKING WEBSITE (https://sib.om/)

Built a modern, responsive banking website optimized for performance, scalability, and user-friendly content management. Led frontend architecture and development with Next.js, creating a fast and highly responsive interface. Integrated Strapi CMS with PostgreSQL for seamless content workflows, and implemented advanced features including dynamic location services with Google Maps API, media optimization with Cloudinary, and SEO-focused performance enhancements.

REVI REALTY (https://revirealty.com/)

Developed a sleek, responsive real estate website to enhance brand presence and user experience. Focused on clean, responsive layouts with HTML, CSS, and JavaScript, while integrating WordPress with Advanced Custom Fields (ACF) for flexible, editable content management. Delivered a scalable and user-friendly site that empowered the client team to easily update and maintain content.

HONDA GCC (https://honda-mideast.com/en/)

Redesigned and developed modern, responsive websites for brands including Honda and an investment firm, aligning with brand identity and modern web standards. Focused on frontend development with pixel-perfect execution, responsive layouts, and seamless user interaction. Integrated WordPress with Advanced Custom Fields (ACF) for flexible, modular content management, ensuring clarity, scalability, and ease of updates. Enhanced performance across devices and implemented smooth, lightweight animations with jQuery and GSAP to create an engaging and intuitive user experience.

THE THESANDWASH (https://thesandwash.ae/)

Developed a modern, responsive website to showcase brand identity with strong performance and easy content management. Focused on frontend development with clean, responsive design and seamless user interaction. Integrated WordPress with Advanced Custom Fields (ACF) to enable flexible, modular content management, while ensuring smooth navigation, optimized performance, and a polished interface enhanced with lightweight animations.

GATEWAY PARTNERS (https://gatewayfund.net/)

Redesigned and developed a modern, responsive investment firm website with a focus on clarity, performance, and scalability. Led frontend development to deliver a pixel-perfect implementation of the new UI, ensuring mobile-first responsiveness and intuitive navigation. Integrated WordPress with Advanced Custom Fields (ACF) to create flexible, easy-to-manage content modules, improving both user engagement and backend usability.

HOSPICS GLOBAL (https://hospicsglobal.com/)

Built a professional digital presence and brand identity for a medical engineering and project management consultancy. Led end-to-end UI design and frontend development, creating a clean, responsive website with custom HTML templates integrated into WordPress using Advanced Custom Fields (ACF). Designed the brand logo to reflect the dual focus on clinical and construction expertise, while implementing interactive jQuery elements for smooth navigation and an engaging user experience. Ensured scalability and easy content management through structured ACF-based CMS integration.
