

The TOP 11

CLEVER WAYS DOCTORS USE DOXIMITY

1. READING THE NEWS

“Doximity DocNews saves me the time and energy that would otherwise be spent scouring the internet for breaking articles in radiation oncology. Now I can get the majority of that information in a single place – giving me more time to focus on patient care or learning how to become a better radiation oncologist.”

– Trevor Royce, MD: Radiology, Boston, MA

2. SEARCH, LEARN & EARN CATEGORY 1 CME

“Recently, a case of ARCAPA (anomalous right coronary artery arising from pulmonary artery) presented to my office. I researched this rare condition right before seeing my patient using CME search, then offered her the best advice based on data. I’ve been using it more and more to find relevant articles in rare topics.”

– Jose Taveras, MD: Cardiology, New York, NY

3. FAX

“At the airport, I used Doximity to fax an urgent order to a patient’s infusion center; they got the fax before I made it through security!”

– Danielle Hardwood, MD: Family Medicine, Chico, CA

4. SECURE TEXTING

“Yesterday, I used the app to get the cell number of the radiologist that read the cat scan, discuss results, text with patient’s nephrologist and get clearance faxed from patient’s cardiologist. All in 10 minutes.”

– Andrew Tompkins, MD: Urology, West Warwick, RI

5. SEARCH & FIND CLINICAL TRIALS

“I was searching for clinical trials for one of my patients with severe eczema refractory. In my search, I was referred to a nearby expert. Instead of calling the department, or trying to search through the many webpages of the hospital, I found the physician on Doximity and simply sent her a message via Doximity on my iPhone and got my patient set up with the clinical trial manager within a matter of hours.”

– Kristin Sokol, MD: Allergy & Immunology, Brookline, MA

6. SEARCH ~~AND~~ FIND DOCTORS

“ I had a very rare and interesting neuroradiology case during one of my weekend calls. Our neuroradiologist, who is in his 60's, told me he has an acquaintance in Boston who would likely know the diagnosis, however, did not have his contact information. He searched Google and a few other sites, yet we were not able to locate him. I mentioned Doximity, and we logged in and were able to locate him through that. Within a few days he had the case, and provided his input, which aided in patient care.”

— Pardeep Athwal, MD: Radiology, Chicago, IL

7. MEDICAL TRANSLATOR

“ Despite the gravity of a recent patient's situation, I learned she failed to follow up with the subspecialist I referred her to. Eventually, my patient revealed the language barrier was her hurdle. She felt uncomfortable discussing all of her private issues in front of a translator. In under 5 minutes on Doximity app, I found a nearby specialist fluent in her language. She happily followed up with the new doctor.”

— Ani Abrahamyan, MD: Internal Medicine, Oakland, PA

8. CONNECT *with* EXPERTS

“ I was struggling with a complex patient with a very rare condition — sclerosing mesenteritis. I easily found an article on Doximity authored on that topic by an expert and was able to contact the author. He told me about a medicine that he was trying out on his patient and it just all worked out.”

— Aparajita Singh, MD: Gastroenterology, San Francisco, CA

9. MOONLIGHTING GIG

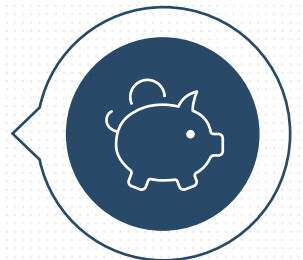

“ As a family medicine physician, I receive a lot of recruiting emails. Shortly after joining, I received a Doximity message about a locum tenens opportunity in my hometown. For the first time, a recruiting service provided a match that made sense for me. I'm not sure how I would've found this opportunity had it not been for Doximity.”

— Moshe Usadi, MD: Family Medicine, Charlotte, NC

10. FIND ~~A~~ JOB

“ Through Doximity's networking opportunities, I landed my current role at the Managed Division of AIDS Healthcare Foundation and received consulting offers to provide expert witness work.”

— Wayne Chen, MD: Geriatrics, Los Angeles, CA

11. OWN GOOGLE S.E.O.

“ Updating my Doximity account has improved the Google search for my name. Better, more relevant results since I updated my profile a couple years ago.”

— Sarah Bryczkowski, MD: Surgery, Newark, NJ
