

# GAGGED AND SLASHED

## How Trump's Global Gag Rule and Budget Cuts Will Harm Women and Communities

**\$10.2 BILLION\***

Global Gag Rule shifts global health assistance funding

Providers who insist on providing comprehensive services become ineligible

Providers willing to provide **LESS** comprehensive services receive funding

Services cease

New donors step in to help fund comprehensive services (but can't make up for all the funding lost)

Eligible providers not present in communities; services cease

Incomplete services are provided

Women and communities have **REDUCED ACCESS** to contraception and critical health services

Global health assistance slashed by up to one-third.\*\* This unprecedented proposed budget cut would further devastate health systems and put lifesaving care out of reach for even more communities
