

East Bay Community Energy

New Resource Adequacy and/or Peak Energy

2019 Request for Information

Response to Questions

RFI Issuance Date: Friday, September 6, 2019

Question Submission Deadline: Tuesday, September 17, 2019

Question Response Deadline: Friday, September 20, 2019

Question 1.

Will responses to the EBCE/Peak Energy RFI be confidential? If not, what level of public disclosure should we expect?

EBCE does not intend to post any proposal materials publicly and will keep pricing information confidential. EBCE must comply with the California Public Records Act and its requirements to the extent applicable. EBCE will share the information with San Jose Clean Energy, as stated in the RFI, though the information may also be shared with other CCAs in the event of a follow-on joint procurement effort. If you do not wish for your response to be shared with any parties other than EBCE and SJCE, please indicate on the added field on the 'Developer Background' tab (row 19).

Question 2.

Would EBCE be open to accepting a bridge if a project doesn't COD before 01/01/2022? If EBCE would be open to accepting a bridge, would they like it in the form of REC's, Energy, or RA?

Yes, EBCE is open to creative proposals that meet our needs. Specifically, EBCE will consider projects with CODs at a later date and the option for a bridge product. Please provide information relative to each of the bridge options as EBCE could be open to any combination or subset of the product offerings indicated.

Question 3.

Would you be willing to accept power from a solar farm via a direct connection transmission line to a location of your choice in the East Bay?

EBCE is open to innovative projects and solutions that can ultimately deliver energy or energy related products to CAISO.
