

Question	Answer
<p>Would a City be permitted to do a self-install of the equipment, since we would be doing the assessment, any needed wiring, and the permitting of the project all in house? (One site already has an open permit and is under construction.)</p>	<p>Yes, this would be allowed.</p>
<p>Do you want the resumes of anyone involved with the project?</p>	<p>This is not required; applicants are welcome to provide resumes if they wish.</p>
<p>Since there are no EnergyStar listings for cooking hobs, can we assume that most any induction hob will be acceptable?</p>	<p>As long as the equipment has been tested by a national lab, e.g. NSF or UL, then it should be acceptable.</p>
<p>Since there are no EnergyStar listings for INDUCTION steam table replacements, can we assume that any induction steam table replacement (typically known as "dry well" warmers) will be acceptable?</p>	<p>As long as the equipment has been tested by a national lab, e.g. NSF or UL, then it should be acceptable.</p>
