1. These figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historical Product Content Label the actual resource mix of the electricity you purchased.
2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

For comparison, the current average mix of resources supplying California includes: Eligible Renewable (31.7%), Coal (3%), Nuclear (9%), Natural Gas (34.2%), Large Hydroelectric (14.6%), and Other (7.5%). This resource mix was prepared in accordance with the California Public Utilities Commission.

The average home in the EBCE/PG&E service area uses 359 kWh per month. Source: Pacific Gas and Electric Company
