### Current rates as of March 2022

This table compares electricity costs for an average commercial customer in the EBCE/PG&E service area with an average monthly usage of 1,799 kilowatt-hours (kWh). This is based on a representative 12-month billing history for all customers on the B-1 rate schedule for PG&E's and EBCE's published rates as of March 2022.

**Generation Rate** is the cost of creating electricity to power your business. The generation rate varies based on your energy provider and the resources included in your energy provider's generation supply.

**PG&E Delivery Rate** is a charge assessed by PG&E to deliver electricity to your business. The PG&E delivery rate depends on your electricity usage but is charged equally to both EBCE and PG&E customers.

**PG&E PCIA/FF** The PCIA is a charge to ensure that both PG&E customers and those who have left PG&E service to purchase electricity from other providers pay the above market costs for generation resources that were procured by PG&E on their behalf. "Above market" refers to expenditures for electric generation resources that cannot be fully recovered through sales of these resources at current market prices. PG&E acts as a collection agent for the FF surcharge, which is levied by the California Public Utilities Commission on behalf of cities and counties in PG&E's service territory for all customers. PG&E bundled customers pay the PCIA and FF fees associated with the most currently available vintage year. PG&E charges EBCE customers the PCIA and FF fees based on the year that they transitioned to EBCE service. Visit [www.ebce.org/rates](http://www.ebce.org/rates) for more information.

If this comparison does not address your specific rate, please visit PG&E online at [pge.com/cca](http://pge.com/cca) or call **1-866-743-0335**. For more information on EBCE's generation rates, please visit [ebce.org/rates](http://ebce.org/rates) or call **1-833-699-EBCE (3223)**.
