MD-PLUG

GMSOFT

ENHANCING MOBILE FORENSICS WITH FASTER CHIPSET-LEVEL EXTRACTIONS

MD-PLUG is a purpose-built mobile forensics accessory designed to work exclusively with MD-NEXT v2.0 and later, enabling DFIR professionals to conduct faster, more efficient extractions from a range of devices.

- Perform advanced extractions, including chipset-based FFS (Full File System) extractions, on new or highly secure devices
- Achieve consistent, stable connections between MD-NEXT and target devices, minimising extraction errors and interruptions in the field or lab
- Ensure integrity during critical evidence collection with secure data transfer
- Streamline workflow with dual USB ports: one for the target device and one for the analyst's PC running MD-NEXT
- Expand your device's compatibility – access 170+ models using Exynos and MediaTek chipsets

MD-PLUG gives DFIR teams the stability, compatibility, and performance needed to stay ahead in fast-moving mobile forensic environments.

Size and Weight	Size L x W x H (13 x 53 x 85mm) Weight 44g
Physical Configuration	Easily connect MD-PLUG and PC with a USB cable. 
USB Specification	USB 3.0, USB-C Female Port 1EA, USB-C Male Port 1EA
Power	5V, 900mA, 4.5W
Working Temperature	0~60 ℃
LEDs	Status – White/Yellow/Blue/Red/Purple Link – Green Power – Red
Certification	KC, CE, FCC, RoHS Compliant
Manufacturer	GMDSOFT Inc. (Made in South Korea)

What's included?

- MD-PLUG
- Case with User Guide
- 1 Year Warranty

Year	Pricing	
	USD	GBP
1yr	$3,799	£3,039
2yr	$4,999	£3,999
3yr	$6,299	£5,039
4yr	$6,799	£5,439
5yr	$7,499	£5,999
