EXHIBIT A – ORIGINS PLANT PALETTE

(Please refer to the Watersound Landscape Patterns Book for plant images)

Revision Date: May 4, 2017

Plant Palette I

The following plant palette has been carefully selected and tested to fit the unique context and growing conditions at WaterSound. The majority of plants listed are native to this environment. Also included are certain non-native and non-invasive species, strategically chosen to broaden and enrich the range of colors and textures available in this xeric landscape setting.

Trees and shrubs other than those listed are not allowed. A greater latitude to use non-listed plants in the categories of vines, grasses, ferns and aquatic plants may be given in the design review process, as long as such plants are non-invasive. The perennials listed are but a few of those known to flourish in this area and may also be augmented by other non-invasive species. For a list of invasive species, see the State Agricultural List of Florida Invasive Plants at http://www.fleppc.orb/Plantlist/list.htm.
