Revision Date: 12.12.2023		

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Trade name : Everbuild Stick 2 All Purpose Contact Adhesive 5 Itr

1.2 Relevant identified uses of the substance or mixture and uses advised against

Product use : Sealant/adhesive

1.3 Details of the supplier of the safety data sheet

Company name of supplier	:	Sika Limited
		Watchmead Welwyn Garden City
		Hertfordshire. AL7 1BQ
Telephone	:	+44 (0)1707 394444
Telefax	:	+44 (0)1707 329129
E-mail address of person	:	EHS@uk.sika.com
responsible for the SDS		C

1.4 Emergency telephone number

National Chemical Emergency Centre (NCEC) 24 Hour Emergency Telephone Number +44 870 190 6777

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)

Flammable liquids, Category 2
Skin irritation, Category 2
Eye irritation, Category 2
Skin sensitisation, Category 1
Skin sensitisation, Category 1
Specific target organ toxicity - single exposure, Category 3, Central nervous system
Long-term (chronic) aquatic hazard, Category 2
H225: Highly flammable liquid and vapour.
H315: Causes skin irritation.
H319: Causes serious eye irritation.
H317: May cause an allergic skin reaction.
H336: May cause drowsiness or dizziness.
H411: Toxic to aquatic life with long lasting effects.

2.2 Label elements

Labelling (REGULATION (EC) No 1272/2008)

Date of last issue: 07.11.2022 Revision Date: 12.12.2023	V	ersion 5.0	Print Date 12.12.2023
Hazard statements :	H225 H315 H317 H319 H336 H411	Highly flammable liquid and va Causes skin irritation. May cause an allergic skin read Causes serious eye irritation. May cause drowsiness or dizzin Toxic to aquatic life with long la	otion. ness.
Precautionary statements	Prevention: P210 P233 P273 P280	Keep away from heat, hot surfa open flames and other ignition smoking. Keep container tightly closed. Avoid release to the environme Wear protective gloves/ protect eye protection/ face protection.	sources. No nt.
	Response: P370 + P378 P391	In case of fire: Use dry sand, dr alcohol-resistant foam to exting Collect spillage.	-

Hazardous components which must be listed on the label:

ethyl acetate Phenolformaldehyd resin Rosin

2.3 Other hazards

This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

Ecological information: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

Toxicological information: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

For explanation of abbreviations see section 16.

SECTION 4: First aid measures

4.1 Description of first aid mea	Isures
General advice	: Move out of dangerous area. Consult a physician. Show this safety data sheet to the doctor in attendance.
If inhaled	: Move to fresh air. Consult a physician after significant exposure.
In case of skin contact	: Take off contaminated clothing and shoes immediately. Wash off with soap and plenty of water. If symptoms persist, call a physician.
In case of eye contact	 Immediately flush eye(s) with plenty of water. Remove contact lenses. Keep eye wide open while rinsing. If eye irritation persists, consult a specialist.
If swallowed	 Do not induce vomiting without medical advice. Rinse mouth with water. Do not give milk or alcoholic beverages. Never give anything by mouth to an unconscious person.
4.2 Most important symptoms	and effects, both acute and delayed
Symptoms	 Allergic reactions Excessive lachrymation Erythema Dermatitis Loss of balance Vertigo See Section 11 for more detailed information on health effects and symptoms.
Risks	: Causes skin irritation. May cause an allergic skin reaction. Causes serious eye irritation.
Country GB 10000021431	4,

Date of last issue: 07.11.2022 Revision Date: 12.12.2023	Version 5.0	Print Date 12.12.2023
	May cause drowsiness or dizziness.	
	irritant effects sensitising effects	
-	dical attention and special treatment need	led
Treatment	Treat symptomatically.	
SECTION 5: Firefighting meas	es	
5.1 Extinguishing media		
Suitable extinguishing media	Alcohol-resistant foam Carbon dioxide (CO2) Dry chemical	
Unsuitable extinguishing media	Water High volume water jet	
5.2 Special hazards arising from	e substance or mixture	
Specific hazards during fire- fighting	Do not use a solid water stream as it may s fire. Do not allow run-off from fire fighting to ent courses.	
Hazardous combustion prod- ucts	No hazardous combustion products are kno	own
5.3 Advice for firefighters		
Special protective equipment for firefighters	In the event of fire, wear self-contained bre	athing apparatus.
Further information	Use water spray to cool unopened containe Collect contaminated fire extinguishing wat must not be discharged into drains. Fire residues and contaminated fire extingu be disposed of in accordance with local reg	er separately. This uishing water must

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures			
Personal precautions	 Use personal protective equipment. Remove all sources of ignition. Deny access to unprotected persons. Beware of vapours accumulating to form explosive concentra- tions. Vapours can accumulate in low areas. 		

Date of last issue: 07.11.2022	Version 5.0	Print Date 12.12.2023
Revision Date: 12.12.2023		

6.2 Environmental precautions

Environmental precautions	:	Prevent product from entering drains. If the product contaminates rivers and lakes or drains inform respective authorities.
		respective automics.

6.3 Methods and material for containment and cleaning up

Methods for cleaning up	:	Contain spillage, and then collect with non-combustible ab-
		sorbent material, (e.g. sand, earth, diatomaceous earth, ver-
		miculite) and place in container for disposal according to local
		/ national regulations (see section 13).

6.4 Reference to other sections

For personal protection see section 8.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

	Advice on safe handling :	Do not breathe vapours or spray mist. Avoid exceeding the given occupational exposure limits (see section 8). Do not get in eyes, on skin, or on clothing. For personal protection see section 8. Persons with a history of skin sensitisation problems or asth- ma, allergies, chronic or recurrent respiratory disease should not be employed in any process in which this mixture is being used. Smoking, eating and drinking should be prohibited in the ap- plication area. Take precautionary measures against static discharge. Open drum carefully as content may be under pressure. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours). Follow standard hygiene measures when handling chemical products
	Advice on protection against : fire and explosion	Use explosion-proof equipment. Keep away from heat/ sparks/ open flames/ hot surfaces. No smoking. Take precautionary measures against electrostatic discharges.
	Hygiene measures :	Handle in accordance with good industrial hygiene and safety practice. When using do not eat or drink. When using do not smoke. Wash hands before breaks and at the end of workday.
7.2	Conditions for safe storage, incl	uding any incompatibilities
	Requirements for storage : areas and containers	Store in cool place. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Store

Date of last issue: 07.11.2022 Revision Date: 12.12.2023		Version 5.0	Print Date 12.12.2023
		in accordance with local regulations.	
Further information on stor- age stability	:	: No decomposition if stored and applied as directed.	
7.3 Specific end use(s) Specific use(s)	:	Consult most current local Product Data Sheet p use.	rior to any

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Occupational Exposure Limits

Components	CAS-No.	Value type (Form of exposure)	Control parame- ters *	Basis *			
ethyl acetate	141-78-6	STEL	400 ppm 1.468 mg/m3	2017/164/EU			
	Further inform	Further information: Indicative					
		TWA	200 ppm 734 mg/m3	2017/164/EU			
		TWA	200 ppm 734 mg/m3	GB EH40			
		STEL	400 ppm 1.468 mg/m3	GB EH40			
acetone	67-64-1	TWA	500 ppm 1.210 mg/m3	2000/39/EC			
	Further inform	ation: Indicative					
		TWA	500 ppm 1.210 mg/m3	GB EH40			
		STEL	1.500 ppm 3.620 mg/m3	GB EH40			
reaction mass of ethylbenzene and xy- lene	Not Assigned	TWA	50 ppm 221 mg/m3	2000/39/EC			
	Further information: Identifies the possibility of significant uptake through the skin, Indicative						
		STEL	100 ppm 442 mg/m3	2000/39/EC			
		TWA	50 ppm 220 mg/m3	GB EH40			
	Further information: Can be absorbed through the skin. The as-						
	•	nces are those for w		ncerns that			
	dermal absorption will lead to systemic toxicity.						
		STEL	100 ppm 441 mg/m3	GB EH40			
Rosin	8050-09-7	TWA (Fumes)	0,05 mg/m3	GB EH40			
	Further information: Substances that can cause occupational						
	asthma (also known as asthmagens and respiratory sensitisers)						
	can induce a state of specific airway hyper-responsiveness via an immunological irritant or other mechanism. Once the airways have						
	become hyper-responsive, further exposure to the substance,						

Date of last issue: 07.11.2022 Revision Date: 12.12.2023 Version 5.0

Print Date 12.12.2023

sometimes even in tiny quantities, may cause respiratory symp- toms. These symptoms can range in severity from a runny nose to asthma. Not all workers who are exposed to a sensitiser will be- come hyper-responsive and it is impossible to identify in advance those who are likely to become hyper-responsive. Substances that can cause occupational asthma should be distinguished from substances which may trigger the symptoms of asthma in people with pre-existing airway hyper-responsiveness, but which do not include the disease themselves. The latter substances are not classified as asthmagens or respiratory sensitisers. Further infor- mation can be found in the HSE publication Asthmagen? Critical assessments of the evidence for agents implicated in occupational asthma., Wherever it is reasonably practicable, exposure to sub- stances that can cause occupational asthma should be prevented. Where this is not possible, the primary aim is to apply adequate standards of control to prevent workers from becoming hyper- responsive. For substances that can cause occupational asthma, COSHH requires that exposure be reduced to as low as is rea- sonably practicable. Activities giving rise to short-term peak con- centrations should receive particular attention when risk manage- ment is being considered. Health surveillance is appropriate for all employees exposed or liable to be exposed to a substance which may cause occupational asthma and there should be appropriate consultation with an occupational health professional over the degree of risk and level of surveillance., The word 'fume' is often used to include gases and vapours. This is not the case for expo- sure limits where 'fume' should normally be applied to solid parti- cles generated by chemical reactions or condensed from the gas- eous state, usually after volatilisation from melted substances. The generation of fume is often accompanied by a chemical reac- tion such as oxidation or thermal breakdown., Capable of causing occupational asthma., The 'Sen' notation in the l
pational asthma in the categories shown in Table 1. It should be remembered that other substances not in these tables may cause occupational asthma. HSE's asthma web pages
(www.hse.gov.uk/asthma) provide further information.
STEL (Fumes) 0,15 mg/m3 GB EH40

*The above mentioned values are in accordance with the legislation in effect at the date of the release of this safety data sheet.

Substance name	CAS-No.	Control parame- ters	Sampling time	Basis
reaction mass of ethylbenzene and xylene	Not Assigned	methyl hippuric acid: 650 Millimo- les per mole cre- atinine (Urine)	After shift	GB EH40 BAT

Date of last issue: 07.11.2022	Version 5.0
Revision Date: 12.12.2023	

Print Date 12.12.2023

8.2 Exposure controls

Engineering measures

Maintain air concentrations below occupational exposure standards. Ensure adequate ventilation, especially in confined areas.

Personal protective equipment

Eye/face protection : Hand protection :	Safety glasses with side-shields conforming to EN166 Eye wash bottle with pure water Chemical-resistant, impervious gloves complying with an ap- proved standard must be worn at all times when handling chemical products. Reference number EN 374. Follow manu- facturer specifications. Suitable for short time use or protection against splashes: Butyl rubber/nitrile rubber gloves (> 0,1 mm) Contaminated gloves should be removed. Suitable for permanent exposure: Viton gloves (0.4 mm),
	breakthrough time >30 min.
Skin and body protection :	Protective clothing (e.g. Safety shoes acc. to EN ISO 20345, long-sleeved working clothing, long trousers). Rubber aprons and protective boots are additionaly recommended for mixing and stirring work.
Respiratory protection :	In case of inadequate ventilation wear respiratory protection. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe work- ing limits of the selected respirator. organic vapor filter (Type A) A1: < 1000 ppm; A2: < 5000 ppm; A3: < 10000 ppm Ensure adequate ventilation. This can be achieved by local exhaust extraction or by general ventilation. (EN 689 - Meth- ods for determining inhalation exposure). This applies in par- ticular to the mixing / stirring area. In case this is not sufficent to keep the concentrations under the occupational exposure limits then respiration protection measures must be used.
Environmental exposure contr	ols
General advice :	Prevent product from entering drains. If the product contaminates rivers and lakes or drains inform respective authorities.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

Physical state	: liquid
Colour	: various
Odour	: characteristic

Date of last issue: 07.11.2022 Revision Date: 12.12.2023	Ve	rsion 5.0	Print Date 12.12.2023
Melting point/range / Freezing point	No data availab	le	
Boiling point/boiling range	> 62 °C		
Flammability (solid, gas)	No data availab	le	
Upper/lower flammability or	plosive limits		
Upper explosion limit / Up- per flammability limit	Upper flammab 13 %(V)	ility limit	
	Upper explosion 13 %(V)	n limit	
Lower explosion limit / Lower flammability limit	Lower explosion 0,6 %(V)	n limit	
	Lower flammab 0,6 %(V)	ility limit	
Flash point	-35 °C		
Auto-ignition temperature	427 °C		
Decomposition temperature	No data availab	le	
рН	Not applicable		
Viscosity			
Viscosity, dynamic	ca. 4.200 mPa.	s (20 °C)	
Viscosity, kinematic	> 20,5 mm2/s (4	40 °C)	
Solubility(ies) Water solubility	insoluble		
Partition coefficient: n- octanol/water	No data availab	le	
Vapour pressure	99,9915 hPa		
Density	ca. 0,85 g/cm3	(20 °C)	
Relative vapour density	No data availab	le	
Particle characteristics	No data availab	le	

9.2 Other information

No data available

Date of last issue: 07.11.2022 Revision Date: 12.12.2023	Version 5.0	Print Date 12.12.2023
SECTION 10: Stability and reactivit	у	
10.1 Reactivity		

No dangerous reaction known under conditions of normal use.

10.2 Chemical stability

The product is chemically stable.

10.3 Possibility of hazardous reactions

Hazardous reactions	:	Stable under recommended storage conditions.
		Vapours may form explosive mixture with air.

10.4 Conditions to avoid

Conditions to avoid : Heat, flames and sparks.

10.5 Incompatible materials

Materials to avoid	:	No data available
--------------------	---	-------------------

10.6 Hazardous decomposition products

No decomposition if stored and applied as directed.

SECTION 11: Toxicological information

11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

Exposure time: 4 h Test atmosphere: vapour

Acute toxicity

Not classified due to lack of data.

Components:		
ethyl acetate: Acute oral toxicity	:	LD50 Oral (Rat): > 5.000 mg/kg
Acute inhalation toxicity	:	LC50 (Rat): ca. 1.600 mg/l Exposure time: 4 h Test atmosphere: vapour
Acute dermal toxicity	:	LD50 Dermal (Rabbit): > 5.000 mg/kg
acetone:		
Acute oral toxicity	:	LD50 Oral (Rat): 5.800 mg/kg
Acute inhalation toxicity	:	LC50 (Rat): 76 mg/l

Date of last issue: 07.11.2022 Revision Date: 12.12.2023	Version 5.0	Print Date 12.12.2023
Acute dermal toxicity :	LD50 Dermal (Rabbit): 20.000 mg/kg	
reaction mass of ethylbenzene	and xylene:	
Acute oral toxicity :	-	
zinc oxide:		
Acute oral toxicity :	LD50 Oral (Rat): > 15.000 mg/kg	
Acute inhalation toxicity :	LC50 (Rat): > 5,7 mg/l Exposure time: 4 h Test atmosphere: dust/mist	
Skin corrosion/irritation Causes skin irritation.		
Serious eye damage/eye irritati Causes serious eye irritation.	on	
Respiratory or skin sensitisation	on	
Skin sensitisation May cause an allergic skin reaction	on.	
Respiratory sensitisation Not classified due to lack of data.		
Germ cell mutagenicity Not classified due to lack of data.		
Carcinogenicity Not classified due to lack of data.		
Reproductive toxicity Not classified due to lack of data.		
STOT - single exposure May cause drowsiness or dizzine	ss.	
STOT - repeated exposure Not classified due to lack of data.		
Aspiration toxicity Not classified due to lack of data.		
11.2 Information on other hazards		
Endocrine disrupting propertie	s	
Product: Assessment :	The substance/mixture does not contain compor ered to have endocrine disrupting properties acc	

Date of last issue: 07.11.2022 Revision Date: 12.12.2023	Version 5.0	Print Date 12.12.2023
	REACH Article 57(f) or Commission De (EU) 2017/2100 or Commission Regula levels of 0.1% or higher.	
SECTION 12: Ecological inform	ation	
12.1 Toxicity		
Components:		
acetone:		
Toxicity to algae/aquatic plants	ErC50 (Pseudokirchneriella subcapitata mg/l Exposure time: 96 h	a (green algae)): > 530
reaction mass of ethylbenzen	e and xylene:	
Toxicity to fish (Chronic tox- icity)	NOEC: > 1,3 mg/l Exposure time: 56 d Species: Oncorhynchus mykiss (rainbo	w trout)
Toxicity to daphnia and other aquatic invertebrates (Chron-ic toxicity)	NOEC: 1,17 mg/l Exposure time: 7 d Species: Daphnia (water flea)	
zinc oxide:		
Toxicity to algae/aquatic plants	EC50 (Selenastrum capricornutum (gre Exposure time: 72 h	een algae)): 0,17 mg/l
M-Factor (Acute aquatic tox- icity)	1	
M-Factor (Chronic aquatic toxicity)	1	
12.2 Persistence and degradability No data available	1	
12.3 Bioaccumulative potential No data available		
12.4 Mobility in soil No data available		
12.5 Results of PBT and vPvB ass	essment	
Product: Assessment	This substance/mixture contains no cor to be either persistent, bioaccumulative	

Date of last issue: 07.11.2022 Revision Date: 12.12.2023	Version 5.0	Print Date 12.12.2023
	very persistent and very bioaccumulative (vPvB) 0.1% or higher	at levels of
12.6 Endocrine disrupting properti	es	
Product:		
Assessment :	The substance/mixture does not contain compon ered to have endocrine disrupting properties acc REACH Article 57(f) or Commission Delegated re (EU) 2017/2100 or Commission Regulation (EU) levels of 0.1% or higher.	ording to egulation
12.7 Other adverse effects		
Product: Additional ecological infor- : mation	An environmental hazard cannot be excluded in tunprofessional handling or disposal. Toxic to aquatic life with long lasting effects.	the event of

SECTION 13: Disposal considerations

13.′	Waste treatment methods		
	Product	:	The generation of waste should be avoided or minimized wherever possible. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe way. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
	European Waste Catalogue	:	08 04 09* waste adhesives and sealants containing organic solvents or other dangerous substances
	Contaminated packaging	:	15 01 10* packaging containing residues of or contaminated by dangerous substances

	May be subject to the Control of Major Accident Hazards Regulations (COMAH), and amendments.

Other regulations:

Take note of The Management of Health and Safety at Work Regulations 1999 (requirements relating to new and expectant mothers at work contained in Regulation 16 to 18) and of the Pregnant Workers Directive 92/85/EEC.

Take note of The Management of Health and Safety at Work Regulations 1999 (requirements relating to protection of young people at work contained in Regulation 19) and of Directive 94/33/EC on the protection of young people at work.

15.2 Chemical safety assessment

No Chemical Safety Assessment has been carried out for this mixture by the supplier.

SECTION 16: Other information

Full	text	٥f	H-Statements
i un	ισλι	UI.	

H225	:	Highly flammable liquid and vapour.
H226	:	Flammable liquid and vapour.
H304	:	May be fatal if swallowed and enters airways.
H312	:	Harmful in contact with skin.
H315	:	Causes skin irritation.
H317	:	May cause an allergic skin reaction.

H319 : Causes serious eye irritation. H332 : Harmful if inhaled H335 : May cause drowsiness or dizziness. H373 : May cause drowsiness or dizziness. H373 : May cause drowsiness or dizziness. H373 : May cause drowsiness or dizziness. H400 :: Very toxic to aquatic life. H410 :: Very toxic to aquatic life. H411 :: Toxic to aquatic life with long lasting effects. H411 :: Toxic to aquatic life with long lasting effects. H412 :: Harmful to aquatic life with long lasting effects. H412 :: Harmful to aquatic life with long lasting effects.
