

2024

ANNUAL REPORT

DEAR FRIENDS, PARTNERS, AND COLLEAGUES,

2024 was a year that once again reminded us of the strength, resilience, and ingenuity of Ukraine's medical community—and the power of working together to support it. At GMKA, our mission has remained clear: to stand with Ukrainian healthcare professionals and patients during one of the most critical moments in the country's history.

This year, our focus was on meeting urgent needs while laying the foundation for long-term, sustainable change. From supporting hospitals treating war-wounded civilians and soldiers, to empowering physicians with cutting-edge education and international collaboration, our efforts have spanned the country. We continued to expand our **HealUA mobile app**, enabling peer-to-peer clinical consultations, and provided translated trauma care resources used daily on the frontlines. Through **observerships in U.S. medical centers**, Ukrainian physicians have brought back lifesaving skills, while our **Women in Medicine initiative** built a platform for female leadership and mentorship in a time when their voices and expertise are needed more than ever.

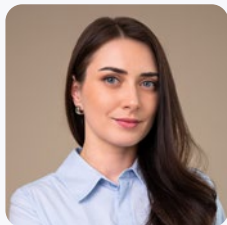

We also partnered with **medical universities** to enhance evidence-based training, and led forums that sparked conversations and solutions around rebuilding and strengthening the healthcare system. Whether it was through a translated clinical guide, a virtual course, or a moment of shared insight between international colleagues—our work this year was rooted in solidarity, education, and action.

We are deeply grateful to each of you—our partners, supporters, volunteers, and collaborators. Thank you for believing in our mission and for being part of this growing alliance. Together, we are not only responding to today's crisis, but building a resilient, modern healthcare system for the Ukraine of tomorrow.

With sincere gratitude and hope,

Nelya and Serguei Melnitchouk

*Co-Founders, Global Medical
Knowledge Alliance*

DEAR FRIENDS, COLLEAGUES, AND PARTNERS,

This past year has been a powerful example of what determination, unity, and purpose can achieve—even in the most challenging of times. As Ukrainian physicians, we have been tested in ways we could never have imagined. Yet through it all, GMKA has stood by our side, helping us respond not only to urgent medical needs but also to the deeper task of rebuilding and strengthening our healthcare system.

Every GMKA project this year—from empowering women in medicine to expanding access to evidence-based cancer care and launching innovative digital tools like the HealUA app—has been rooted in a shared commitment to supporting Ukraine’s medical community. These initiatives have not only addressed the realities of war but have also brought long-term solutions into focus. They have created spaces for learning, for mentorship, and for collaboration across borders. And most importantly, they have reminded us that we are not alone in this fight for a healthier, more resilient Ukraine.

On behalf of GMKA Ukraine, I want to thank our team for their extraordinary perseverance, our international partners for their trust and solidarity, and our wider medical community for the courage and inspiration they bring each day. This annual report is more than a reflection of what we’ve achieved—it’s a reminder of what’s possible when we work together. Let’s continue building a future where every patient in Ukraine has access to high-quality care, and every provider is supported, empowered, and never left behind.

With deep gratitude and renewed hope,

Inesa Huivaniuk

Executive Director, GMKA Ukraine

GMKA MISSION AND VALUES

At GMKA, our mission is to improve the quality of healthcare in Ukraine by expanding access to evidence-based medical knowledge and supporting the development of a strong, resilient medical community.

We create and disseminate high-quality educational resources—from scientific articles to interactive courses—designed to meet the evolving needs of Ukrainian physicians and healthcare institutions. Our international team collaborates closely with local experts to implement projects that strengthen clinical competencies, advance military medicine, promote women’s leadership in healthcare, and support the next generation of medical professionals.

In a time of ongoing crisis, we unite the efforts of leading specialists in Ukraine and around the world to respond to urgent challenges and drive meaningful transformation in the healthcare system. Together, we are building a more capable, adaptive, and empowered medical community—ready not only to meet today’s demands but to shape a healthier future for all.

KEY ACHIEVEMENTS OF THE YEAR

GMKA: ADVANCING HEALTHCARE IN UKRAINE THROUGH EDUCATION, INNOVATION & COLLABORATION

In 2024, we made measurable progress across key areas:

● Improving Clinical Practice:

- ▶ 25 adapted clinical guidelines to support quality improvement in patient care
- ▶ 82 expert articles for physicians, 58 evidence-based articles for patients
- ▶ 240+ expert articles hosted on GMKA's educational platform
- ▶ 25,000+ humanitarian aid items and 3,000+ pieces of medical equipment transferred from U.S. hospitals

● Empowering Physicians Across Ukraine:

- ▶ 4,500 physicians actively using the HealUA app with 571 peer-reviewed clinical cases
- ▶ 55 Ukrainian healthcare professionals participated in international clinical observerships
- ▶ 8 "MedOsvita: A Path to Change" webinars targeting physician education and growth
- ▶ 25 clinical recommendations integrated into our QI initiatives

● Supporting Women in Medicine:

- ▶ 370+ attendees at our national forum *"Women in Medicine: Professional Development and Leadership"*
- ▶ 2,000 member community

for ongoing mentorship, networking, and advocacy to build women leaders in healthcare

● Sharing Knowledge Globally:

- ▶ GMKA presented at 8 major conferences: World Cancer Congress, American College of Surgeons, New England Surgical Society, Society for Brain Mapping and Therapeutics, Harvard Surgery Research Day, European Cancer Organization, American Society of Clinical Oncology, and OncoHUB
- ▶ 6 scientific publications, 17 conference abstracts
- ▶ 7 podcast episodes and 19 short episodes with over 26,980 views

● Expanding Reach and Engagement:

- ▶ 94,000 active educational platform users and 200,196 page views
- ▶ 4,524 file downloads from our resource library
- ▶ 3,755 email subscribers
- ▶ 30,000+ Facebook followers | 18,100+ Instagram | 3,500+ YouTube | 2,200+ Telegram

● Growing Our Collaborative Network:

- ▶ 10+ partner medical institutions
- ▶ Top-5 most viewed publications reflect the demand for timely, trustworthy medical content

GMKA IN MEDIA

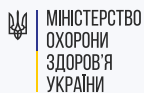

In 2024, GMKA’s work was actively featured in both Ukrainian and international media. Leading news outlets covered our research projects, social and educational initiatives, and the innovative mobile app HealUA. Through these publications, GMKA-related news reached over 1 million Ukrainians.

Each media feature serves as a powerful tool to showcase our impact on improving the quality of patient care and promoting evidence-based medicine. Media coverage also plays a crucial role in raising public awareness of healthcare challenges, encouraging dialogue around solutions, and emphasizing the importance of professional growth for physicians. In particular, it highlights the critical need to support women in leadership roles—an essential step toward meaningful, systemic change in healthcare.

KEY HIGHLIGHTS OF 2024: TRANSFORMING HEALTHCARE IN UKRAINE THROUGH KNOWLEDGE, INNOVATION, AND GLOBAL COLLABORATION

1. National Recognition and Strategic Alliances

Partnership with the Ministry of Health of Ukraine

In 2024, GMKA signed a landmark memorandum of cooperation with the Ministry of Health of Ukraine. This partnership paves the way for collaborative educational initiatives with global experts, the expansion of leadership programs for women in medicine, and the widespread promotion of evidence-based medical practices. Together, we aim to strengthen the stability and effectiveness of Ukraine’s healthcare system—one project, physician, and patient at a time.

Candid Platinum Seal of Transparency

GMKA was honored with the Platinum Seal from Candid, the

highest recognition for nonprofit transparency. This distinction reflects our commitment to accountability, responsible stewardship, and measurable impact as we work to improve patient outcomes and support the healthcare community in Ukraine.

2. Advancing Clinical Practice and Access to Global Standards

Deployed Medicine Guidelines Approved for National Use

To meet the urgent needs of physicians on the frontlines, GMKA translated key clinical trauma guidelines from the U.S. Department of Defense’s Deployed Medicine platform into Ukrainian. On April 25, 2024, the Ministry of Health of Ukraine officially approved and endorsed these materials, making them accessible to both military and civilian medical professionals. The approved topics include essential protocols such as anesthesia in trauma patients, combat thoracic injuries, and management of high-complexity amputations.

Ukrainian Edition of ATLS Published

In partnership with the American College of Surgeons, GMKA translated and published the 10th edition of the Advanced Trauma Life Support (ATLS) manual. This vital resource, now freely accessible in Ukrainian, equips frontline providers with life-saving trauma care protocols and strengthens emergency care across the country.

3. Empowering Women Leaders in Medicine

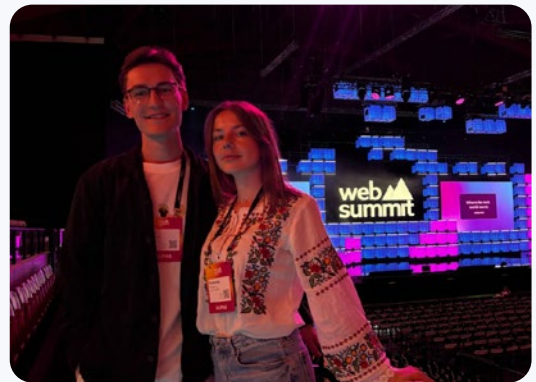

Ukraine's First National Forum for Women in Medicine

In April 2024, GMKA hosted “Women in Medicine: Professional Development and Leadership,” the

first event of its kind in Ukraine. The forum gathered over 280 in-person participants, featured 40+ speakers, and engaged more than 1,300 attendees online. It created a platform for female physicians to connect, grow, and lead transformative change in healthcare. Discussions centered around leadership development, gender equity, healthcare reform, and strategies for balancing personal and professional growth in medicine.

4. Global Recognition for Innovation and Social Impact

HealUA Honored at Web Summit 2024

Our mobile application *HealUA*—which enables peer-to-peer clinical consultations between Ukrainian and international physicians—was recognized as one of the top global healthcare innovations. Out of 2,500 startups, HealUA was selected as part of the exclusive **Startup Alpha** and awarded the **Impact Startup** title for its role in strengthening medical decision-making and saving lives in war-affected areas.

World Cancer Congress Presentation

GMKA presented its findings on cancer care continuity during wartime at the 2024 World Cancer Congress in Geneva. The presentation spotlighted medical evacuation pathways, access barriers for cancer patients, and the urgent need for international collaboration in maintaining oncology care during conflict.

European Cancer Summit Recognition

Our project *“Supporting Women in Oncology in Ukraine”* received a grant from the European Cancer Community Foundation and was featured at the European Cancer Summit. This initiative addresses burnout and mental health challenges among female oncologists and focuses on creating supportive, sustainable career environments for women working on the frontlines of oncology in Ukraine.

5. Representing Ukraine in Global Scientific Forums

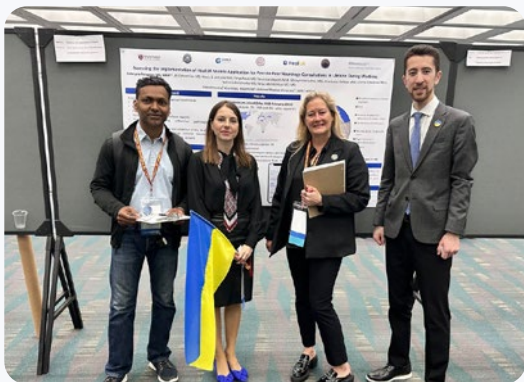

American College of Surgeons Clinical Congress

At one of the world’s largest surgical conferences, the GMKA team presented six original research projects focused on cancer care, wartime medical delivery, and healthcare system adaptation in Ukraine.

ASCRS Annual Scientific Meeting

Dr. Nelya Melnitchouk delivered a powerful presentation on the realities of cancer care in wartime Ukraine. GMKA team member Marta Antoniv presented a research poster based on a national survey of family physicians, exploring barriers to colorectal cancer screening.

21st SBMT World Congress on Brain Mapping and Therapeutics

GMKA played a prominent role at the 2024 SBMT Congress. Ali Dzhemiliev presented how the HealUA app supports remote neurosurgical consultations in conflict zones. Kateryna Potapova co-organized the SBMT Humanitarian Aid Project, chaired the Military Medicine section, and participated in a panel with Deputy Minister of Defense Natalia Kalmykova on wartime healthcare delivery and education in Ukraine.

6. Building a New Era of Medical Education in Ukraine

Fall School of Medical Education

GMKA leaders—Inesa Huivaniuk, Ivan Hornik, and Taras Ivanykovich—participated in the Fall School of Medical Education 2024, a national

platform for policy makers and academic leaders. They shared the success of GMKA’s online course “Physician-Patient Communication” and our ongoing webinar series “MedOsvita: Path to Change”, which support clinical and interpersonal skill development across Ukraine.

OncoHUB UpToDate 5.0 Congress

GMKA helped organize the fifth annual UpToDate oncology congress, bringing together top experts to discuss advancements in cancer diagnostics and treatment. Our team—Inesa Huivaniuk, Kateryna Potapova, and Viacheslav Kopetskyi—moderated sessions and led discussions on oncology care transformation and education.

OUR INITIATIVES

EDUCATIONAL PLATFORM FOR PHYSICIANS

The GMKA Educational Platform is a comprehensive, open-access initiative created to advance the professional development of Ukrainian physicians. By offering high-quality, evidence-based medical resources in Ukrainian, the platform empowers healthcare providers to stay up to date with the latest clinical standards and apply them directly to daily practice.

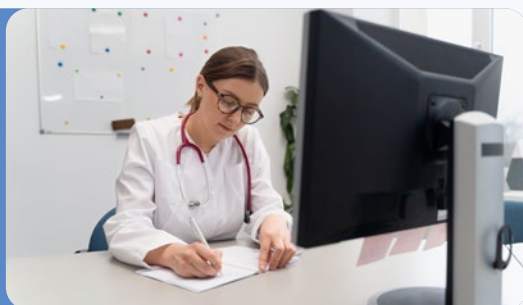

This platform was designed to support ongoing medical education and to strengthen the skills and competencies of healthcare professionals across all specialties, particularly during a time when Ukraine's medical system faces extraordinary challenges.

PROJECT OBJECTIVES

Enhance the clinical competencies of Ukrainian physicians

Facilitate access to the latest international, evidence-based practices

Support continuing medical education across the healthcare community in Ukraine

KEY COMPONENTS OF THE PLATFORM

EDUCATIONAL ARTICLES

We publish articles from leading clinical experts, featuring practical materials, summaries of scientific publications, and updates on clinical practice—all translated into Ukrainian. By the end of 2024, the platform hosted over 500 educational articles, including key resources such as the Ukrainian translation of the ATLS textbook, Deployed Medicine guidelines, and Quality Improvement (QI) algorithms, all available for download and use in clinical settings.

VIDEO TRAININGS

Our platform offers professionally produced video lectures and demonstrations of medical techniques by global experts. These materials are free and easily accessible, allowing physicians to learn at their own pace. One of our flagship video courses, “Principles of Surgery”—featuring instructors from world-renowned institutions—has been viewed more than 8,000 times.

COURSES AND EDUCATIONAL PROJECTS

We provide specialty-specific courses in oncology, trauma, surgery, neurology, and more, with certification upon completion. GMKA is an official provider of Ukrainian equivalents of Continuing Medical Education (CME) credits, ensuring that our offerings meet international standards for professional development.

PODCASTS

Our podcast series features interviews with medical experts, physicians, patients, and community leaders. These engaging discussions cover practical advice and explore pressing healthcare issues. Podcasts are designed to be accessible to both physicians and patients, helping bridge the gap between clinical expertise and public understanding.

WEBINARS

GMKA webinars offer interactive learning experiences where participants can engage directly with speakers, ask questions, and join live discussions. This format encourages dialogue and peer learning while addressing relevant and timely topics in healthcare.

HEALUA: ACCELERATING CLINICAL COLLABORATION IN TIMES OF CRISIS

HealUA is an innovative mobile application developed by GMKA to support rapid, secure, and expert collaboration between Ukrainian and international physicians. Born out of urgent need during the full-scale invasion of Ukraine, the platform addresses the new realities of wartime medicine—where evolving patterns of injury and disease, combined with limited access to information, create immense pressure on healthcare providers.

HealUA allows physicians to quickly and effortlessly seek second opinions, consult colleagues across specialties, and receive real-time recommendations on complex cases. This tool directly enhances the quality of care provided to both military and civilian patients, even in the most resource-constrained and high-stress environments.

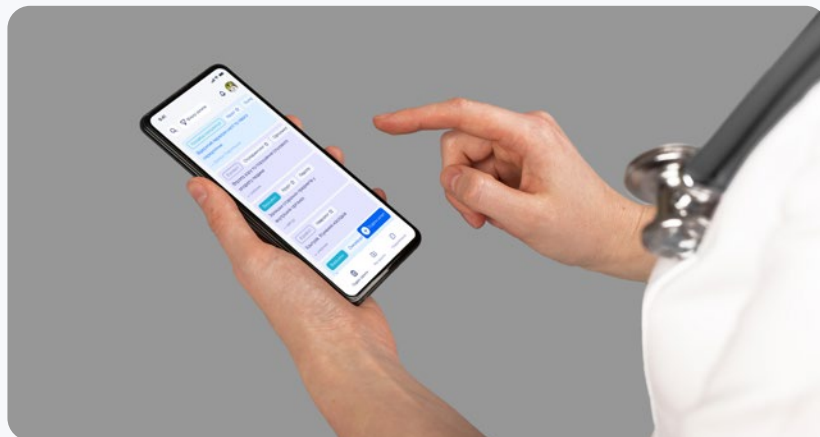

Today, HealUA connects a global network of over **4,500 physicians across 39 specialties** from Ukraine, the U.S., Poland, Germany, and 27 other countries. More than 5,000 comments have been exchanged within the app, fostering collaboration and peer-to-peer learning across borders. Communication is available in both Ukrainian and English via secure **text messages and video calls**, ensuring accessibility for all users.

In 2024, **HealUA was internationally recognized at Web Summit**, one of the world's premier technology conferences. Selected from over 70,000 applicants to join the prestigious **Startup Alpha** program, HealUA was awarded the **Impact Startup Award**—a testament to its global significance and transformative role in wartime healthcare delivery.

The HealUA app is available free of charge in the **App Store (iOS)** and **Google Play (Android)**.

You can download it directly here: www.onelink.to/healua.

HealUA continues to prove that in times of crisis, connection saves lives.

INTERNATIONAL CLINICAL OBSERVERSHIPS

GMKA supports Ukrainian physicians and medical students in gaining international clinical experience through fully sponsored observerships at some of the world’s most prestigious medical institutions. These observerships, lasting from 1 to 3 months, provide participants with immersive exposure to evidence-based diagnostic and treatment practices, the opportunity to acquire valuable clinical insights, and access to advanced research projects.

Participants engage directly with global leaders in medicine, learning firsthand about cutting-edge approaches to care while building lasting professional connections. This initiative is designed to foster knowledge exchange, enhance clinical competencies, and strengthen Ukraine’s medical workforce in the long term.

In 2024, 55 Ukrainian physicians representing 15 medical specialties completed observerships abroad. The program brought together more than 80 mentors from internationally renowned institutions, who generously shared their expertise to support the next generation of Ukrainian healthcare leaders.

PROGRAM PARTNERS INCLUDE:

Yale University

Help Ukraine Group

Harvard Scholars at Risk

Mass General Brigham

American Society of Clinical Oncology

Shriners Childrens

Dana-Farber Cancer Institute

Stanford University

MD Anderson Cancer Center

UA-Med

Heal Ukraine Group

This initiative continues to open doors for Ukrainian physicians, equipping them with the skills, knowledge, and networks to improve patient care and contribute to the future of medicine in Ukraine.

WOMEN IN MEDICINE: EMPOWERING LEADERSHIP, ADVANCING EQUITY

Women in Medicine is a flagship initiative by GMKA, created by and for women physicians to promote professional growth, mentorship, leadership, and solidarity across specialties. Launched in response to persistent gender disparities in healthcare, the program provides a supportive space for women to connect, learn, lead, and advocate for systemic change in medicine and medical education.

In 2024, the Women in Medicine community grew to nearly **2,000 participants** across platforms including Instagram, Facebook, and Telegram. The initiative delivered a robust calendar of activities, including:

- [1 national research study](#) on gender equity in Ukrainian medicine
- [9 educational webinars](#) with expert speakers
- **12 Medical English Speaking Club sessions**, supporting language and leadership skills
- [Regular publications](#) of evidence-based articles for physicians on the GMKA platform

A National Milestone: Forum for Women in Medicine

On **November 15–16, 2024**, GMKA hosted Ukraine’s first national forum on women’s leadership in healthcare:

[“Women in Medicine: Professional Development and Leadership.”](#)

The event, co-organized with the American-Ukrainian charity foundation *Razom for Ukraine*, brought together over **280 in-person attendees, 50 virtual participants, and 40+ expert** speakers. The forum focused on empowering women leaders, building managerial competencies, supporting personal and professional development, and tackling gender inequality in healthcare and medical education.

Featured speakers included:

- **Oleksandra Matviichuk**, Nobel Peace Prize Laureate and human rights advocate
- **Ulana Suprun**, physician, reformer, and former Acting Minister of Health of Ukraine
- **Inna Sovsun**, political leader and former Deputy Minister of Education and Science
- **Pavlo Kovtoniuk** and **Matviy Khrenov**, Co-Founders of the Ukrainian Health Center
- **Vasyl Strilka**, Director of High-Tech Medical Care and Innovation, Ministry of Health

This landmark event not only amplified the voices of women physicians but also launched a broader conversation on inclusion, reform, and leadership in Ukraine's healthcare system.

Recognition and Collaboration

In 2024, the Women in Medicine initiative received a grant from *The Network of Hubs of Ukraine under the program "Grants for Inexperienced Civil Organizations and Initiative Groups."* GMKA also began an important new partnership with **UNFPA Ukraine**, laying the groundwork for future collaborative projects focused on gender equity, health, and leadership.

The Women in Medicine program continues to build momentum—strengthening the role of women in shaping the future of Ukrainian healthcare.

RESEARCH AND ANALYTICS: DRIVING EVIDENCE-BASED CHANGE IN UKRAINIAN HEALTHCARE

At GMKA, research is not just a tool—it's a catalyst for systemic improvement. Our **Research and Analytics** initiative evaluates emerging needs in healthcare and develops **data-driven recommendations** to strengthen medical education, clinical practice, and policy in Ukraine. We are committed to building Ukraine's academic potential by actively engaging physicians, researchers, and medical students in impactful, real-world research.

Key Research Highlights from 2024

National Study on Gender Equity in Surgery

In 2024, GMKA conducted a groundbreaking nationwide study titled:

"Women in Surgery: The Problem Does (Not) Exist?"

Surveying **340 female surgeons** across specialties, the study exposed significant gender-based challenges faced by women at every stage of their careers—from education to employment and workplace dynamics. Alarming, **80% of respondents**

reported being told they “do not belong in surgery” solely due to their gender. These findings have sparked national dialogue and underscore the urgent need for gender equity in Ukrainian surgical training and leadership. [The full study is available on the GMKA website.](#)

International Conference Presentations

GMKA’s research findings were shared globally at prestigious academic forums, raising awareness of wartime healthcare challenges and positioning Ukraine’s medical voice on the international stage:

- **SBMT Annual World Congress (Los Angeles, CA)**

Implementation of HealUA Mobile Application for Peer-to-Peer Neurology Consultations During Wartime — Oral presentation

- **Harvard Surgery Research Day (Boston, MA)**

Education in Adversity: A Pioneering Initiative to Enhance Surgical Knowledge in Wartime Ukraine

Cancer Capacity Mapping at the Time of War — Poster presentations

- **Association for Surgical Education (ASE) Annual Meeting (Orlando, FL)**

Gender Disparities in Surgical Training in Ukraine — **Oral presentation**

- **Annual Symposium on Global Cancer Research (Virtual)**

- ▶ Patient Financial Well-being and Access to Cancer Treatment During Wartime — **Oral presentation**
- ▶ Multidisciplinary Cancer Treatment Capacity in Ukraine During the War
- ▶ Doctor Perspectives on Diagnosis and Treatment Quality
- ▶ Factors Affecting Breast Cancer Screening and Diagnosis Delays in Ukraine — **Poster presentations**

- **World Cancer Congress (Geneva, Switzerland)**

- ▶ Multidisciplinary Cancer Treatment Capacity During the War in Ukraine
- ▶ Factors Affecting Cancer Diagnosis and Treatment Delays — **Oral presentations**

- **American College of Surgeons Clinical Congress (San Francisco, CA)**

- ▶ The State of Reconstructive Surgery During the War in Ukraine
- ▶ Enhanced Recovery After Surgery (ERAS) for Colectomy in Ukraine: A Nationwide Practice Survey
- ▶ Exploring Gender Dynamics in Surgical Training in Ukraine: A Qualitative Study — **Oral and poster presentations**

QUALITY IMPROVEMENT OF MEDICAL CARE: RAISING THE STANDARD, ONE LIFE AT A TIME

The **Quality Improvement (QI) of Medical Care** project is designed for Ukrainian physicians who are committed to transforming healthcare from within. This initiative focuses on advancing clinical care through data-driven decision-making, the implementation of internationally recognized standards, and a structured, systematic approach to improving patient outcomes.

Our strategy includes:

- In-depth data collection and analysis
- Integration of international clinical care guidelines
- Development of process algorithms and standard surgical protocols
- Education and training for medical staff
- Implementation of evidence-based practices to enhance communication and care delivery
- Strategic approaches to reduce medical errors and optimize resource utilization

The goal is to ensure that Ukrainian healthcare is not only resilient under pressure, but continuously evolving toward safer, more effective, and more efficient care for all patients.

2024 Achievements and Partnerships

In 2024, three regional medical institutions joined the QI initiative:

- **Kyiv Regional Oncology Center**
- **Mykolaiv Regional Oncology Center**
- **Rivne Regional Clinical Hospital**

Together, we developed and launched a centralized database to **monitor and analyze infectious complications among surgical patients**, enabling data-informed planning and targeted development of educational materials for clinical teams.

This initiative is implemented in collaboration with global leaders in healthcare and medical education, from the following institutions:

- **Massachusetts General Hospital**
- **Brigham and Women's Hospital**
- **Johns Hopkins Hospital**
- **Temerty Faculty of Medicine, University of Toronto**

Through these partnerships, Ukrainian physicians gain access to the world's best practices in quality improvement and patient safety, empowering them to lead meaningful, lasting change in their institutions and beyond.

WEBINAR SERIES: MEDOSVITA (MEDICAL SCHOOL EDUCATION) — PATH TO CHANGES

The **MedOsvita: Path to Changes** webinar series is a GMKA initiative designed to spark meaningful dialogue and drive reform in Ukraine's medical education system. Amid the ongoing war and significant challenges facing the healthcare sector, this project brings together physicians, educators, policymakers, students, and public leaders to explore bold ideas for transforming both undergraduate and continuing medical education.

The goal is clear: to build a modern, transparent, and effective system for training and supporting medical professionals in Ukraine. These webinars serve as a platform for honest conversation, expert insight, and collaborative solution-building—focusing on professional development, system reform, and lifelong learning.

In 2024, GMKA hosted **8 webinars** in the series, attracting over **3,000 registrations** and **4,500+ views** on YouTube. Each session featured prominent voices in medicine, education, and policy, offering diverse perspectives and actionable recommendations.

2024 Webinar Topics and Speakers:

- [“Education You Didn’t Know You Missed”](#)
Oleksandr Linchevskyy, military surgeon and former Deputy Minister of Health (2016–2019)
- [“No One Will Vote for This: The Residency Regulations”](#)
Inna Sovsun, public activist, former Deputy Minister of Education and Science, political science professor at Kyiv-Mohyla Academy
- [“Residency 2024: Everything About the New Allocation System”](#)
Serhii Dubrov, anesthesiologist, First Deputy Minister of Health of Ukraine
- [“Medical Education Is Not the Worst Thing Awaiting You”](#)
Oleksandr Babliak, cardiac surgeon, Head of the Cardiac Surgical Center at Dobrobut
- [“Higher Education Transformation in Ukraine”](#)
Mychailo Wynnnyckyj, Deputy Minister of Education and Science, public activist, and professor at Kyiv-Mohyla Academy
- [“How to Build Harvard in Ukraine”](#)
Vadym Vus, family medicine physician and professor at International European University

- [“Medical Education Environment in Ukraine”](#)

Tetiana Chernysh, Lead of the Ukrainian-Swiss project Development of Medical Education

- [“Modern Medical Education: Challenges and Opportunities in Ukraine”](#)

Iurii Kuchyn, Dean of Bogomolets National Medical University

Through **MedOsvita**, GMKA fosters a national conversation on what medical education in Ukraine could—and should—look like. By uniting thought leaders and future healthcare professionals, this project is helping to lay the groundwork for long-term systemic reform and excellence in Ukrainian medical training.

MEDICAL LITERACY: COMBATING MISINFORMATION, EMPOWERING PATIENTS

Misinformation in healthcare can cost lives. That’s why GMKA is committed to improving **medical literacy of Ukrainian patients** by providing accurate, accessible, and evidence-based medical information. Our goal is to empower patients to actively participate in their care—by knowing what questions to ask, understanding their diagnoses, and making informed decisions based on reliable sources.

Through this initiative, we work to counter medical myths and promote a culture of informed health choices in Ukraine. We collaborate with physicians, scientists, and patient organizations to develop high-quality educational content that is grounded in global clinical standards and tailored to the realities of Ukrainian healthcare.

Our materials are created in multiple formats to ensure wide accessibility—**articles, flyers, videos, podcasts, courses**, and even **scientific**

research studies in collaboration with patient organizations. Each resource is designed to be practical, understandable, and impactful.

2024 Highlights:

- Developed content across **11 key specialty areas**, including:
Psychological Aid, Emergency Medicine, Physical Rehabilitation, Surgery, Oncology, Dermatology, Dentistry, Transfusiology, Gastroenterology, Gynecology, and Nutrition
- Engaged **40+ medical experts from 5 countries**
- Published **70+ educational videos** on YouTube, gathering **over 70,000 patients**
- Released **58 patient-centered articles** on the GMKA website, reaching **more than 208,000 readers**

By increasing medical literacy, we are not only improving individual health outcomes, but also strengthening trust in evidence-based medicine and the physician-patient relationship. An informed patient is a safer, healthier patient—and GMKA is proud to support that transformation.

MEDICAL ENGLISH: EXPANDING GLOBAL COMMUNICATION FOR UKRAINIAN PHYSICIANS AND NURSES

In today's global medical landscape, **English proficiency** is not just a skill—it's a gateway to opportunity. From attending and presenting at international conferences to participating in clinical exchanges and accessing cutting-edge research, fluency in Medical English is essential for professional growth.

The **GMKA Medical English** program offers Ukrainian physicians a welcoming, supportive space to develop their language skills and expand their medical vocabulary. Through **biweekly virtual sessions** led by experienced instructors, participants from across Ukraine engage in dynamic conversations, professional development activities, and collaborative learning.

In 2024, the program included:

- **Two targeted groups:**
 - ▶ A general Medical English group for physicians and nurses across all specialties

- ▶ A dedicated group for women physicians as part of the Women in Medicine initiative
- **60-minute sessions**, held **every two weeks over two-month cycles**
- **148 physicians** trained over an **8-month period**, building confidence, fluency, and community

In addition to live classes, GMKA provides **daily self-study materials** across its digital platforms—supporting continuous learning for busy physicians. Our [Telegram channel](#) “*Learn Medical English with GMKA*” features engaging idioms, useful phrases, humorous videos, and practical vocabulary-building tips. In just 10 months, the channel attracted **over 1,500 learners**.

Here's what participants had to say:

I loved the atmosphere—everyone was motivated, sincere, and pleasant. There were no arrogant comments if someone made a mistake. The organization was great, and the instructor's personality was amazing—positive, inspirational, and always supportive.

Renata

I liked that we reviewed mistakes together, had a shared vocabulary file, and the group was friendly and easy-going. It made learning enjoyable and effective.

Yuliia

Through this initiative, GMKA is equipping physicians with the language skills they need to thrive on the international stage—building confidence, opening doors, and strengthening Ukraine's voice in global medicine.

AID FOR UKRAINE: DELIVERING CRITICAL MEDICAL SUPPORT IN TIMES OF WAR

Ensuring the uninterrupted functioning of Ukraine's healthcare system during wartime remains a priority for GMKA. As medical professionals work under extreme conditions—often near the frontlines—our mission is to provide the tools, equipment, and support they need to continue saving lives.

Through the **Aid for Ukraine** initiative, GMKA delivers critical medical aid to healthcare facilities treating those injured by Russia's full-scale invasion. We work directly with hospitals and frontline responders to address urgent needs, offering life-saving resources and logistical coordination to ensure timely, secure delivery.

Thanks to the generosity of our international partners—including **Heal Ukraine Group, Lake Country Medical Aid for Ukraine, and Aid Pioneers**—we've been able to source and distribute essential medical resources to institutions across the country.

What We've Delivered in 2024:

- Over **25,000 items of humanitarian aid** (non-financial support) from U.S. hospitals
- **3,000+ units of medical equipment and surgical supplies**, including:
 - ▶ Portable ultrasound machines
 - ▶ Negative Pressure Wound Therapy (NPWT) devices
 - ▶ Evacuation squad equipment
 - ▶ Bleeding control kits
 - ▶ Essential medications and consumables
- Support coordinated with **10+ partner medical institutions** across various regions

GMKA ensures all aid deliveries are managed through a **trusted logistics network**, and we maintain **transparent reporting** to our donors and partners.

This initiative reflects our unwavering commitment to stand with Ukraine's medical community—supporting those who risk their lives to care for others, and ensuring patients receive the care they deserve, even in the most difficult conditions.

GMKA PODCASTS: TRUSTED VOICES IN UKRAINIAN HEALTHCARE

In a time when misinformation spreads quickly and patients and physicians alike seek trustworthy information, **GMKA Podcasts** serve as a reliable, accessible, and engaging source of medical knowledge. This initiative bridges the gap between expert insight and everyday health concerns—presenting evidence-based content in a conversational, user-friendly format.

Each episode features thoughtful dialogue with physicians, researchers, and patient advocates, covering a wide range of relevant topics. The goal is to inform, inspire, and support both the medical

community and the public—by highlighting real experiences, expert recommendations, and emerging challenges in healthcare.

2024 Highlights:

- Released **19 podcast episodes**, including **7 in-depth expert conversations**
- Gained **25,000+ views** and added **800+ new subscribers** to [GMKA's YouTube channel](#)
- **Most viewed episodes:**
 - ▶ *Questions about Military Medicine*
 - ▶ *Colon Cancer: What You Need to Know*
 - ▶ *The Importance of Blood Donation*

Our team continues to develop new episodes that explore pressing healthcare issues, promote evidence-based practices, and elevate the voices of patients and providers. Through GMKA Podcasts, we aim to spark conversation, encourage learning, and contribute to a more informed and empowered healthcare community in Ukraine.

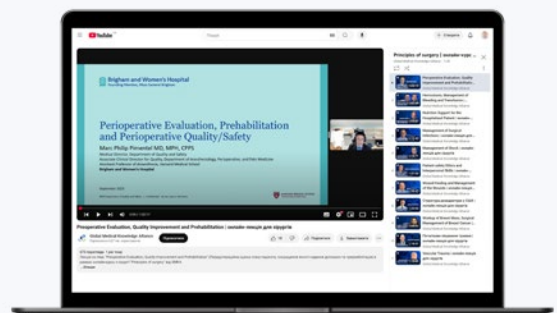

VIRTUAL TRAINING: PRINCIPLES OF SURGERY — ADVANCING SURGICAL EDUCATION IN UKRAINE

The “**Principles of Surgery**” online training was created by GMKA to support the professional development of Ukrainian surgeons and surgical residents amid wartime challenges. Developed in alignment with the **USA surgical residency curriculum**, the course provided a structured and high-quality educational experience tailored to Ukraine’s evolving clinical landscape.

Running from **September 2023 to June 2024**, this one-year program focused on core surgical principles while fostering global peer-to-peer learning and expert engagement.

Course Highlights:

- **Curriculum Structure:**
 - ▶ 2 semesters: **15 lectures (Fall) + 23 lectures (Spring)**
 - ▶ **38 total online sessions**, all available via open access on [GMKA's YouTube channel](#)

- **Content:**

Core surgical topics, evidence-based practices, and interactive case discussions with renowned international experts

- **Faculty:**

Lectures were delivered by leading surgeons from the USA, Italy, Poland, and Ukraine, including experts from Brigham and Women's Hospital and Massachusetts General Hospital

Participation & Recognition:

- **42 surgeons** from **16 Ukrainian cities** participated
- To receive certification, participants were required to maintain over 75% attendance and achieve **80% or higher on assessments**
- Graduates received an **Electronic Certificate of Completion** and **+40 Continuing Medical Education (CME) credits**

Awards for Top Participants:

- **1st Place:** Observership at a U.S. hospital
- **2nd & 3rd Place:** Participation in an advanced three-day surgical course in Romania

This initiative not only delivered advanced knowledge but also connected Ukrainian surgeons with a global surgical community, fostering academic exchange and elevating standards of care in Ukraine. GMKA remains committed to developing and expanding high-impact educational opportunities for medical professionals on the frontlines of healthcare transformation.

ONCOLOGY THINK TANK: ADVANCING CANCER CARE IN UKRAINE

The **Oncology Think Tank** is a strategic initiative by GMKA that brings together a diverse coalition of **leading oncologists, government officials, scientists, patient advocates, and cancer survivors** to address Ukraine's most urgent oncological challenges. In a country deeply affected by war, where healthcare infrastructure is under constant strain, this initiative plays a critical role in shaping the future of cancer care.

The goal of the Oncology Think Tank is clear: to improve **cancer prevention, early detection, treatment, and survivorship**—while ensuring that patients across Ukraine, including those in frontline and de-occupied areas, have **equitable access to high-quality care**.

This expert-driven platform actively supports the **integration of evidence-based clinical oncology practices** into Ukraine's national healthcare strategy. By aligning with the **Ministry of Health of Ukraine**, the Oncology Think Tank helps to prioritize cancer care within national reform efforts.

Key Objectives:

- Develop data-informed strategies to improve cancer outcomes in Ukraine
- Facilitate access to world-class diagnostic and treatment protocols
- Ensure equitable cancer care for vulnerable populations, including those affected by displacement and war
- Strengthen the role of oncology in healthcare policy and system-wide planning
- Support the adaptation and implementation of global standards in Ukrainian oncology practice

The Think Tank's **analytical team meets regularly** to identify gaps, propose reforms, and provide actionable recommendations—bridging local expertise with international best practices. Together, we are working to raise survival rates, enhance the quality of life for cancer patients, and build a resilient, patient-centered oncology system for the future of Ukraine.

OUR IMPACT

At GMKA, we believe that by empowering physicians, we improve healthcare for every patient. Our work is rooted in the belief that a strong, well-supported, and well-educated medical community is essential to transforming the future of medicine in Ukraine—especially in times of war.

Through our **educational, social, and scientific initiatives**, we address the pressing challenges in Ukrainian healthcare—from medical education reform and clinical quality improvement to patient empowerment and international collaboration. We work hand-in-hand with physicians, educators, patients, and government institutions to build a resilient system of care that meets the highest global standards.

Our activities include:

- Developing the competencies of Ukrainian physicians and medical students
- Supporting the professional growth of outstanding young doctors
- Expanding access to international clinical experience through observerships
- Promoting gender equality in medicine through mentorship and leadership training
- Enhancing access to global clinical guidelines and evidence-based practices
- Collaborating with patient organizations to improve care and health literacy

Together, we are nurturing a new generation of medical professionals equipped to lead Ukraine's healthcare transformation.

VOICES FROM THE FIELD

Yelizaveta Ivolzhenko,

First Aid and Tactical Medicine Instructor

I want to thank you for the ATLS manual translation—I had wished to read it for a while! The GMKA website is incredibly user-friendly, and being able to read the textbook online helps me greatly in my work.

Oleksandr Danylyuk,

Captain, Medical Service; Deputy Director, Department of Health Protection, Ministry of Defense of Ukraine

Physicians must make critical decisions quickly. With access to evidence-based clinical guidelines like those from the Joint Trauma System, Ukrainian doctors are better prepared to save lives. Translating and implementing these guidelines is a vital step toward aligning Ukraine's medical system with NATO standards.

**Anna Uzlova,**

Director, Inspiration Family

Our collaboration with GMKA began during the war, but quickly became foundational. Together with GMKA, OncoHub, and the National Cancer Institute, we conducted a major research study on access to cancer care in wartime. These findings have fueled our advocacy efforts to protect patients. GMKA's professionalism, transparency, and compassion make them an invaluable partner.

**Dr. Andriy Beznosenko,**

Chief, Thoraco-Abdominal Oncology,
National Cancer Institute

GMKA plays a critical role in helping Ukrainian physicians make informed decisions, even under extreme conditions. Their resources support not just clinical decision-making, but also the broader professional development of medical specialists. It is an invaluable platform for the entire Ukrainian medical community.

**Juliana Maslak,**

Pediatric Psychiatrist, Co-Founder,
Make Yourself

Being part of GMKA's National Forum for Women in Medicine was an incredibly inspiring experience. It brought together women determined to grow, lead, and transform healthcare in Ukraine. Through open conversation and shared experiences, GMKA has created a powerful space for connection, advocacy, and real change.

**Kseniia Vosnitsyna,**

Director, Mental Health and Rehabilitation
Center "Lisova Polyana", Ministry
of Health of Ukraine

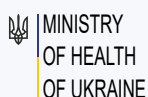

During war, when traumatic injuries and stress-related conditions are widespread, the need for scientifically backed clinical tools is greater than ever. The GMKA-led translation of Deployed Medicine guidelines—including mild TBI protocols—is one of the most impactful initiatives we've seen. It brings consistency, safety, and clarity to trauma care.

**Military Surgeon**

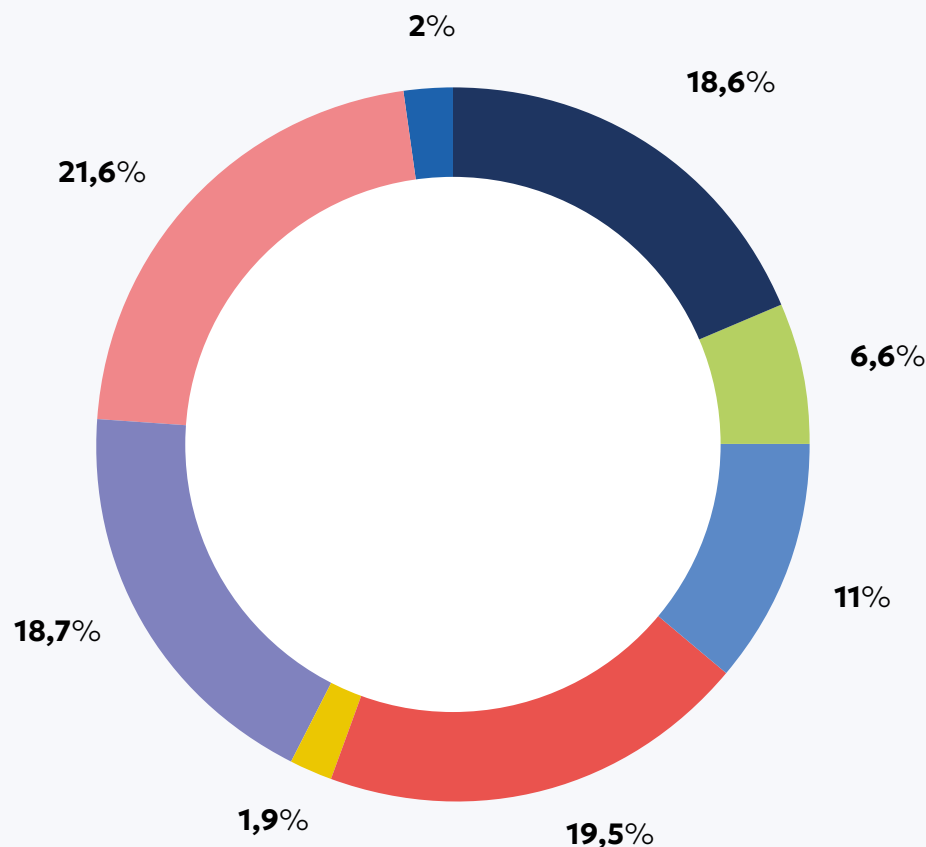

We signed off on the first block of Deployed Medicine guidelines. It's a proud moment for Ukraine—our Ministry of Health and Ministry of Defense are finally bringing world-class clinical guidance to Ukrainian physicians, in our own language, in a clear and structured format.

PARTNERSHIPS AND COLLABORATION

In response to Russia's full-scale invasion, supporting Ukrainian physicians and improving patient care is more critical than ever. GMKA works closely with **governmental institutions** and **trusted partners** from both medical and non-medical sectors to unite efforts and drive meaningful, measurable impact in healthcare.

PLANS FOR 2025: SUPPORTING UKRAINE'S MEDICAL FUTURE THROUGH EDUCATION, LEADERSHIP, AND KNOWLEDGE SHARING

In 2025, Global Medical Knowledge Alliance (GMKA) will continue its mission to strengthen Ukraine's healthcare system by providing high-quality, accessible educational opportunities for physicians, nurses, and healthcare professionals across the country. Our focus will remain on empowering Ukraine's medical workforce, building professional communities, and popularizing evidence-based medicine—essential pillars for a resilient and modern healthcare system.

Our strategy includes the expansion of online and in-person trainings, collaboration with world-renowned academic institutions, growth of the HealUA international medical network, publication of clinical and patient education materials, and organization of large-scale **national events to unite and inspire Ukraine's medical community**.

KEY FOCUS AREAS FOR 2025

Educational Trainings

GMKA will continue to invest in continuing medical education by offering structured training programs designed to meet the real-world needs of Ukrainian clinicians:

- Emergent Care for Traumatic Brain Injury (TBI)
Lectors: Memorial Hermann Hospital – Texas Medical Center
Early evaluation, stabilization, and evacuation based on U.S. guidelines.

- Foundations of Clinical Research for Physicians
Lectors: Harvard, Stanford, and Yale Medical Schools
Building research competency and academic advancement.
- Extended Neurosurgery Course: Best Practices and Innovations
Lectors: Harvard Medical School, Texas Medical Center
Integrating theory, clinical skills, and emerging technologies.

- U-COPE (Ukraine Clinical Oncology Project ECHO)
Lectors: MD Anderson Cancer Center
Enhancing oncology practice and cancer care delivery in Ukraine.
- Principles of Patient Care for Nurses
Lectors: Memorial Hermann – Texas Medical Center
Professional development in patient-centered nursing.
- Deployed Medicine & Polytrauma: Global Practices in Ukrainian Reality
Lectors: Harvard, Stanford, Yale, University of Toronto
Complex trauma case reviews and real-time experience exchange.
- Physician-Patient Communication for Better Care
Lectors: Mayo Clinic, Harvard, Stanford, GMKA Ukraine
Building trust and improving care through effective communication.
- Quality Improvement & Patient Safety in Healthcare
Lectors: Harvard, Stanford, Yale, University of Toronto
Implementing modern systems for care quality and safety.
- Health Policy Development: From Problem to Solution
Lector: Inna Sovsun, National University of Kyiv-Mohyla Academy
Introducing physicians to evidence-based policy creation and advocacy.

FORUMS

- National Forum: Vector of Changes in Healthcare
A first-of-its-kind national forum dedicated to strategic healthcare transformation in Ukraine. Topics will include reforms, health system management, clinical quality, medical science, and communication.
- International Oncology Forum with AACR (American Association for Cancer Research)
Location: Krakow, Poland
A cross-border forum uniting 50 oncologists from Ukraine and Poland. Focused on scientific writing, research communication, ethics, and professional networking.
- National Forum: Women in Medicine — Professional Development and Leadership 2.0
A continued platform to cultivate leadership, mentorship, and career growth among women physicians across specialties. The forum will focus on skill-building, strategic thinking, and real-world examples of leadership in action.

STRATEGIC PRIORITIES FOR 2025

Expanding Educational Opportunities

Launching new, high-impact trainings on advanced clinical methods, healthcare delivery, and practical tools for frontline providers.

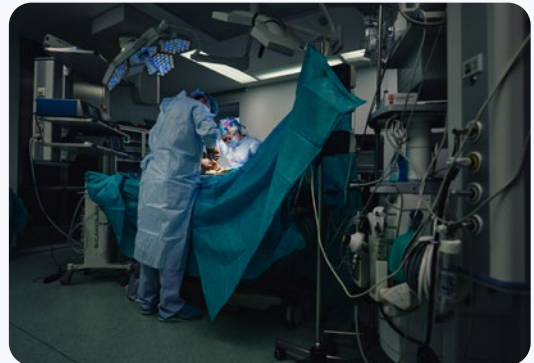

Strengthening International Collaboration

Deepening partnerships with leading global medical institutions to facilitate clinical experience exchange, mentorship, and educational access for Ukrainian professionals.

Promoting Growth & Leadership for Women in Medicine

Advancing GMKA's Women in Medicine initiative by offering mentorship, skill-building, and leadership training to support women physicians in leading healthcare innovation and systems development.

Building Healthcare Capacity

Supporting Ukrainian hospitals and professionals in adopting modern quality improvement systems, patient safety protocols, and evidence-based management tools.

In 2025, GMKA will continue standing alongside Ukraine's medical community—building the skills, systems, and leadership needed to navigate today's challenges and lead tomorrow's transformation.

GMKA TEAM

BOARD OF DIRECTORS

Serguei Melnitchouk, MD, MPH, FACS

Founder and Chairman of the Board

Dr. Melnitchouk is a board-certified cardiac surgeon at Massachusetts General Hospital, specializing in minimally invasive mitral valve surgery. Dr. Melnitchouk is an Assistant Professor of Surgery at Harvard Medical School and the Program Director of the Heart Valve Program at Massachusetts General Hospital (Boston, MA).

Nelya Melnitchouk, MD, MPH, FACS

Founder and CEO/President

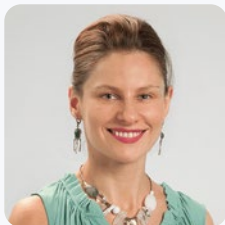

Dr. Nelya Melnitchouk is a board-certified colorectal surgeon at Brigham and Women's Hospital and an Assistant Professor of Surgery at Harvard Medical School. She is also the Program Director of Colorectal Surgery Fellowship. She founded and leads the Peritoneal Surface Malignancy Program at Brigham and Women's Hospital and Dana Farber Cancer Institute (Boston, MA).

Jennifer Davids, MD

Board Member/Editor

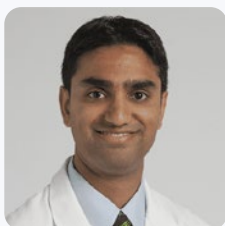

Dr. Jennifer Davis is a Chief of Colon and Rectal Surgery in the Department of Surgery at Boston Medical Center, where she also serves as Inpatient Medical Director and Associate Chair for Clinical Operations. Dr. Davids serves as an at-large member of the Executive Council of the American Society of Colon and Rectal Surgeons (ASCRS), and is on the editorial board of Diseases of the Colon and Rectum, Techniques in Coloproctology, and Clinics in Colon & Rectal Surgery. Dr. Davids is a Senior Examiner for the American Board of Colon and Rectal Surgeons.

Ivanka Kovalyshyn, MD

Board Member, Editor

Dr. Ivanka Kovalyshyn is a board-certified dermatologist and dermatopathologist. She graduated from Queens College (City University of New York) and received her medical degree from Chicago College of Osteopathic Medicine. Ivanka completed her dermatology residency and dermatopathology fellowship at the Cleveland Clinic in Cleveland, OH.

Mihir Naik, DO

Board Member

Dr. Mihir Naik is a board-certified radiation oncologist who practices at Cleveland Clinic, FL. He attended medical school at the Midwestern University - Chicago College of Osteopathic Medicine. He completed his internship at Advocate Christ Medical Center in Oak Lawn (Illinois, USA). He continued his training in radiation oncology residency at the University of Texas Health Science Center in San Antonio and Cleveland Clinic in Cleveland (Ohio, USA).

ADVISORY BOARD

Miruna Burk

Miruna is a director at Accenture and works with GMKA to improve the quality of cancer care.

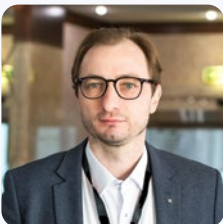

Oleksandr Linchevskyy, MD

Dr. Linchevskyy is a military surgeon, former Deputy Minister of Health of Ukraine (2016-2019), and General Medical Director of Dobrobut. In the GMKA team, he is an advisor on improving medical education, surgery, and military medicine.

Julie Gralow, MD

Dr. Julie Gralow is the Chief Medical Officer and Executive Vice President of the American Society of Clinical Oncology (ASCO). At GMKA, she is an advisor on partnerships and quality improvement in cancer care.

Andriy Beznosenko, MD

Dr. Andriy Beznosenko is a Chief Medical Officer and the Head of the Scientific Department of Thoraco-Abdominal Surgery at the National Cancer Institute (Kyiv, Ukraine). He is an advisor on improving oncology treatment in Ukraine.

BOARD OF DIRECTORS, GMKA UKRAINE

Serguei Melnitchouk, MD, MPH, FACS

Dr. Melnitchouk is a board-certified cardiac surgeon at Massachusetts General Hospital, specializing in minimally invasive mitral valve surgery. Dr. Melnitchouk is an Assistant Professor of Surgery at Harvard Medical School and the Program Director of the Heart Valve Program at Massachusetts General Hospital (Boston, MA).

Nelya Melnitchouk, MD, MPH, FACS

Dr. Nelya Melnitchouk is a board-certified colorectal surgeon at Brigham and Women's Hospital and an Assistant Professor of Surgery at Harvard Medical School. She is also the Program Director of Colorectal Surgery Fellowship. She founded and leads the Peritoneal Surface Malignancy Program at Brigham and Women's Hospital and Dana Farber Cancer Institute (Boston, MA).

Solomiia Semeniv, MD

Dr. Semeniv is a general surgeon at the University Hospital in Krakow and is a researcher and lecturer at Jagiellonian University (Krakow, Poland). She acquired her medical degree from Bogomolets National Medical University. Solomiia completed her residency in pediatric surgery and endoscopy fellowship at the National Children's Hospital "Okhmatdyt" (Kyiv, Ukraine).

Galyna Shabat, MD

Dr. Shabat is a general surgeon and operative endoscopist at the Department of General and Foregut Surgery, IRCCS Policlinico San Donato (Milan, Italy). She acquired her medical degree from Ivano-Frankivsk National Medical University (IFNMU) and worked at IFNMU as an Assistant Professor at the Department of Surgery (2012-2014). She completed her research training at IRCAD (France) and Brigham and Women's Hospital at Harvard Medical School (Boston, MA).

Oleh Vdoviyak

Communication and Digital Marketing Expert, Adviser to Minister of Health of Ukraine in 2016-2017.

MD, medical editor, and
translator.

Mariana Kuryk,
Continuing Professional
Development (CPD)
Manager.

Marta Antoniv,
MD, Director of Research.

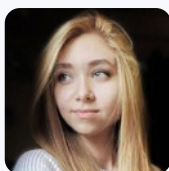

Taras Ivanykovych,
Project Coordinator of
QI, educational initiatives,
HealUA, Research and
Analytics; MedOsvita
Project Lead.

Svitlana Stashkiv,
MD, Communication
Manager.

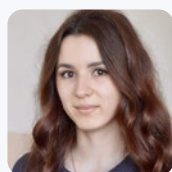

Yuliia Novosad,
Project Manager of GMKA:
Women in Medicine,
Communication Specialist
for HealUA.

Svitlana Bielichenko,
MD, moderator of the
HealUA.

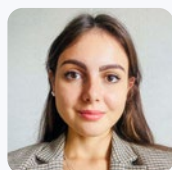

Maksym Horiachok,
Project Coordinator of QI,
Research and Analytics,
HealUA, translator;
Military Medicine editor.

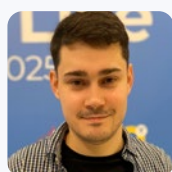

Olha Kostenchak-Svystak,
GMKA Expert,
Hematology.

Maksym Khrapak,
GMKA Expert,
Anesthesiology and
Intensive Therapy.

Anastasia Bondar,
GMKA intern.

Markiian Nozdrin,
GMKA intern.

Valeria Chorna,
GMKA intern.

Anna Nykonenko,
GMKA intern.

Alyona Topikha,
GMKA intern.

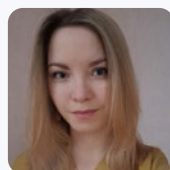

Anastasia Liach,
GMKA intern,
communication specialist
for the QI project.

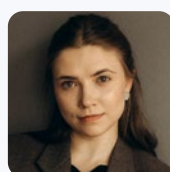

Anna Karavska,
GMKA intern.

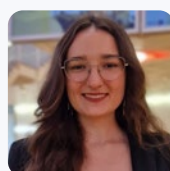

Mariia Bilorosiuk,
GMKA intern.

Olha Zabara,
GMKA intern.

Iryna Vereshchak,
GMKA intern.

Daryna Khoptar,
GMKA intern.

Anna Veskera,
GMKA intern.
