

AUTOPACK 3L

TRIPLE LANCE TUBE CLEANING

MEET THE AUTOPACK 3L DUAL BELT

Engineered to reduce manual handling, simplify service, and support a safer transition into automation, the AutoPack 3L delivers consistent feeding, high torque, and scalable configuration options for demanding industrial environments.

Dual-belt drive technology reduces slip and uneven feeding under load and interchangeable drive cartridges simplify cleaning and maintenance, minimizing downtime between runs.

Ready for Sentinel® technology on day one by design, the AutoPack 3L Dual Belt allows crews to adopt automation on their timeline without replacing core equipment.

AUTOPACK 3L

Remote adjustment of hose clamp pressure and feed rates allows for consistent and repeatable cleaning

Accommodates hose sizes from 3/2 to 8/4 without any modifications

Compatible with Modular Hose Containment

Dual Belts provide torque for long tube runs and reduce slip and uneven feeding under load

Triple, dual, or single-lance operation
