

JACK TRACK

ABRASIVE CUTTING SYSTEM

Lightweight, modular straight-track system **FOR PRECISION CUTTING**

- Configurable for straight, beveled and radial cutting of surfaces and pipes
- Designed with a cutting-edge venturi system for maximum media suction and minimal equipment wear
- Includes a calculator planning app to setup and perform cutting jobs with confidence
- Adjustable feed rate control allows for cutting at 20-50k pressures, 1/8"-12" per minute
- Unique design allows for magnetic or suction attachment option
- Rigid or Flex Lance track options available
- 12VDC wireless and 12VDC cabled control along with Hydraulic and Pneumatic control options

ACCESSORIES

FOR PIPE AND RADIUS CUTTING

CIRCLE/PIPE CUTTER

FOR LARGE DIAMETER CUTS

- Magnetic/Suction Mount Option for Radius Cutting
- Bracket Mount Option for Pipe Cutting
- Aluminum Construction
- 12VDC, Hydraulic, or Pneumatic Control Option
- Radius Cutting: Cuts up to 48" Diameter
- Pipe Cutting: Cuts Pipe 3" - 24" Diameter

MINI-RADIUS CUTTER

FOR SMALL DIAMETER CUTS

- Specifically designed for ease in cutting corner radii and small holes
- Cuts radii greater than or equal to 3.25"
- 12VDC, Hydraulic, or Pneumatic Power Option
- Magnetic/Suction Mount
- Adjustable 1/8" to 12" per minute feed rate
- Center Pin for easy location to scribed point
