## Press release

The manufacturer CDA presents its packaging solutions dedicated to all professionals.

### THE COMPANY CDA

Since its founding in 1991, CDA has been dedicated to designing and manufacturing increasingly efficient packaging solutions. Based in Narbonne, Occitania, our company has experienced continuous growth and now employs nearly 150 people. Our range of machines includes filling machines, capping machines, labelling machines, and monoblocs (3-in-1 packaging solutions), enabling us to offer a comprehensive and tailored response to various challenges.

Whether you operate in the food, pharmaceutical, cosmetic, or any other industry, our machines are designed to precisely meet your specific needs. Our specialized team works closely with you to thoroughly understand your unique requirements. We are committed to maintaining a culture of constant innovation, developing customized solutions that efficiently optimize your packaging process. At CDA, we are by your side at every stage, from initial design to installation and beyond.

### E-Fill SW, the Ideal Packaging Partner

The E-Fill SW is a complete packaging line that enables filling, capping, and labelling of small containers (from 5 to 250 ml) all in one machine. This machine offers two operating modes: fully automatic (for large batches) and switch mode. It can reach a speed of up to 50 products per minute (on 10 ml bottles).

Easy to use and adjust, the E-Fill SW is highly regarded for its versatility and reliability.
