

## Communiqué de Presse

The SIPA Group is specialize in the design and production of parts made of cellular materials such as Expanded Polystyrene (EPS), Expanded Polypropylene (EPP), Eco-materials.

With the help of our design office, we design and develop tailor-made solutions based on the technical and economic issues of our customers. Our know-how is varied: packaging, technical parts, thermal and acoustic insulation, for equally numerous fields of activity: the food industry, automobiles, HVAC, construction, sport & leisure, health, events, .....

We also have a machining to prototype our customers' projects.

In our range of own products, we offer a handling bin, also a reusable shuttle bin which allows an internal/external logistics flow for sensitive products (painted parts, machined parts) of our customers.

Responsive and close to our customers, we have 3 sites: SIPA in Burgundy, PLASTYROBEL in Auvergne and CAPAG in the Paris region.
