

## **WALTHER Faltbox at All4Pack 2024:**

### **Sustainable reusable packaging solutions for the future of logistics**

At this year's All4Pack, the WALTHER Faltbox Group will showcase its established portfolio of sustainable, reusable packaging solutions at Stand K 052 in Hall 5. As a pioneer in plastic load carriers, the company offers customized solutions for a wide range of logistics requirements, always with a clear focus on sustainability and the circular economy.

#### **Reusable over disposable – in line with the PPWR**

WALTHER supports customers in meeting the new requirements of the European Union's Packaging and Packaging Waste Regulation (PPWR) with durable and recyclable reusable products. This regulation calls for increased use of sustainable packaging to reduce the ecological footprint. WALTHER's foldable boxes, large containers, pallets, and trays contribute to resource conservation and enable volume-reduced returns, optimizing logistics processes.

#### **Focus on sustainability and innovation**

WALTHER's packaging solutions not only deliver high functionality but also emphasize environmental consciousness and innovation. The company uses high-quality, reusable materials with a lifespan of up to 20 years. At the end of their lifecycle, the products can be fully recycled and reintegrated into the production process – an important contribution to the circular economy.

#### **Tailored solutions for every need**

Every company has specific packaging requirements. The WALTHER Faltbox Group offers customized products that are perfectly adapted to meet each customer's unique demands. From size and design to particular functional specifications, the company develops solutions that address the individual needs of various sectors, including the automotive, retail, food, and pharmaceutical industries.

Visit WALTHER at All4Pack in **Hall 5, Stand K 052**, and discover how reusable packaging can help address tomorrow's logistical challenges in a sustainable way.

### **About WALTHER Faltsysteme**

WALTHER Faltsysteme GmbH, based in Kevelaer, Germany, specializes in customized reusable transport packaging of all sizes from a single source. As a pioneer in foldable reusable plastic containers, company founder Rolf F. Walther developed the first foldable plastic box available on the German market over 45 years ago. At its site in Kevelaer, the company integrates everything under one roof, from development and mold making to large-scale production. WALTHER Faltsysteme provides customers with customized prototypes of new products within just a few days and brings innovations to market within weeks. WALTHER Faltsysteme's clients include well-known companies such as EDEKA, Continental, and the Vaillant Group.
