

Kargopek to Unveil New Biodegradable Packaging Solutions at All4Pack Paris Exhibition

Paris, France, November 4-7, 2024 – Kargopek, a leader in the packaging industry, is excited to showcase its latest biodegradable packaging solutions at the upcoming All4Pack Exhibition in Paris, from November 4-7, 2024. These innovative products are designed to meet the growing demand for eco-friendly packaging while maintaining Kargopek's standards of durability and quality. The new product line offers a sustainable alternative to traditional plastic packaging, reducing environmental impact.

"At Kargopek, we are proud to offer solutions that combine sustainability and quality," said Ramazan Değişici, owner of Kargopek. **"The All4Pack Paris Exhibition gives us a fantastic opportunity to present our biodegradable packaging solutions to international partners who seek both eco-friendly and high-performance products."**

At the All4Pack exhibition, Kargopek's biodegradable packaging solutions will be available for viewing and pre-order at our booth. Kargopek continues to innovate, offering a broad range of products that cater to industries such as retail, food, and logistics while leading the way in sustainable packaging.

About Kargopek:

Kargopek is a leading provider of durable, eco-friendly, and customizable packaging products. The company continues to serve global markets with innovative solutions that emphasize both sustainability and quality.
