**GRAIN  
DE  
SAIL**

## **Organic French chocolate bars sailing into new markets - Taste the sustainable adventure**

Grain de Sail, the innovative French chocolatier and pioneer in decarbonized shipping, is excited to showcase its commitment to sustainability and ethical sourcing. Following its successful U.S. market entry, Grain de Sail is now focusing on expanding its presence across Europe while staying true to its core values of environmental responsibility and fair-trade practices.

Grain de Sail is the world's only commercial manufacturer and exporter of fine chocolates using cargo sailboats powered solely by wind. Each transatlantic journey is carefully planned to maximize efficiency and sustainability. After delivering its products to international markets, the sailboats are loaded with humanitarian medical supplies bound for NGOs in the Caribbean. From there, the vessels collect raw cocoa mass to be used in the company's chocolate factory in Brittany, France, creating an environmentally responsible supply chain.

With its growing fleet of modern cargo sailboats, Grain de Sail is expanding its footprint to markets across Europe. The company is actively seeking distributor partners in key regions including but not restricted to Belgium, Germany, Scandinavia, the UK, and Ireland. Grain de Sail is looking to establish distribution partnerships with supermarket chains focusing on mainstream channels while remaining open to other distribution opportunities. With a proven track record of success in France, where it has reached annual sales of over 4 million chocolate bars, and a successful launch in the U.S. market, Grain de Sail is well-positioned for rapid growth in Europe. The company seeks partners who share its values of sustainability, transparency, and quality.

Grain de Sail's product range includes a curated selection of dark and milk chocolate bars, all crafted in its chocolate factory in Brittany. In addition to chocolate, Grain de Sail's product range includes sustainably sourced coffee. While the company does not offer white-label products, it provides customized packaging tailored to meet the specific needs of different markets, ensuring that local preferences and regulatory requirements are fully met.

Grain de Sail's mission is not just about selling chocolate and coffee – it's about contributing to a more sustainable future for the planet. By promoting responsible sourcing, reduced carbon footprint and humanitarian efforts, the company demonstrates that ethical business practices can go hand in hand with commercial success.

Grain de Sail's participation at SIAL Paris 2024 underscores the company's commitment to making a positive impact on both people and the planet. As it continues to grow in Europe, Grain de Sail invites partners and consumers alike to join in its journey towards a more sustainable and ethical food industry.
