

Founded in 1996, MYfoods has accumulated nearly 30-year experience in manufacturing and exporting premium nuts and dried fruits for global B-end buyers. Rooted in China's prime agricultural growing regions, MYfoods sources raw materials directly from local farmers who practise sustainable and ethical farming. By cutting intermediate links, the brand realizes transparent traceability from farm to shipment. Equipped with state-of-the-art processing facilities, MYfoods applies strict full-chain quality control covering harvesting, production, testing and final delivery. Its core product portfolio includes dried apple rings, dried apple dices, dried apple slices, walnuts in shell, walnut kernels, raisins and bitter apricot kernels. With stable batch quality and flexible bulk supply capacity, MYfoods's goods are widely exported to Europe, USA, Canada, Australia, the Middle East and many other overseas markets.

Against the evolving global food supply chain, MYfoods keeps adhering to its founding values: reliable product quality, transparent sourcing and customer-oriented service. The brand focuses on building trust-based long-term partnerships with importers, distributors and food processors worldwide, delivering competitive Chinese-origin dried fruit and nut solutions and pursuing mutual success together.
