About Us

Agromex has been supplying food ingredients to manufacturers and wholesalers across Europe for over 10 years.

We began with a strong specialization in walnuts and have since expanded our portfolio to include seeds, cold-pressed and refined oils, sugars and other ingredients — offering our partners a broader range of ingredients from one reliable source.

The business is straightforward. The consequences of getting it wrong are not — a late container, an off-spec lot, a missing document. Our job is to make sure those problems do not become yours.

One principle drives everything we do: optimising our operational efficiency to remain competitive in the market, without compromising food safety, product quality or regulatory compliance.

We work closely with our partners to understand the product, its application and the requirements that matter most — so every ingredient we offer has a clear purpose and fits a real business need.

01 FOOD SAFETY FIRST

EU-compliant food safety standards, risk-based testing and lot-level traceability

03 ORIGIN-DIRECT PRICES

Direct sourcing from trusted origins reduces unnecessary intermediaries and keeps value in the product

02 WE DELIVER WHAT WE PROMISE

What you approve is what you receive — to the agreed specification, lot after lot

04 EFFICIENT & FLEXIBLE LOGISTICS

Flexible EU logistics with safety stock, scheduled deliveries and lower minimum order quantities

BELLA NOCE

IN-SHELL WALNUTS

Grown in a 100-ha high-tech orchard in Ukraine, designed and planted by a specialized French company and equipped with state-of-the-art harvesting and processing machinery. An underground irrigation system delivers water directly to the root zone, giving the trees consistent conditions through the season and producing walnuts of the highest and most uniform quality.

FERNOR

A French INRA cultivar (Franquette × Lara) selected for premium nut quality.

- Sweet, light-coloured kernels with excellent flavour and pale, attractive colour.
- A well-sealed shell that limits oxygen ingress, protecting the kernel and extending shelf life.
- A high kernel-to-nut ratio — typically in the mid-40% range — with the kernel filling the shell completely.

Calibres (mm): 28+ 30+ 32+ 34+ 36+

Packaging: 10 kg paper bags, big bag 800 kg

LARA

A French cultivar developed near Bordeaux and one of the first varieties proven suitable for intensive, mechanically harvested orchards.

- Large, well-rounded nuts of excellent kernel quality, with consistent calibre.
- A firm but thin, well-lignified shell that protects the kernel while cracking cleanly.
- Very high productivity, supporting reliable volumes and continuity of supply.
- Early ripening — harvested from the beginning of September, opening the season ahead of later varieties.

Calibres (mm): 30+ 32+ 34+ 36+ 38+ 40+

Packaging: 10 kg plastic bags, big bag 800 kg
