COMPANY

Yugotrejd doo is a family company with a long tradition and many years of experience in freezing and processing frozen fruit. Since 1993, we have processed frozen berries and stone fruits. Considering the rich and varied fruit production in our region, we have expanded our capacities and offer to a wide range of fruits, so that we offer raspberry, plum, sourcherry, blackberry, strawberry, blueberry, apricot. Our goal is to be among the leading companies engaged in the delivery and processing of healthy fruit, grown in a healthy environment, according to EU standards and regulations. Our facilities have all the necessary technology with which we achieve the desired level of product quality, with which we can respond to the demands of our partners and customers. The fruit is frozen in strictly controlled process and packed according to market requirements. Production facilities for collecting and freezing of fruits are located in Arilje, Prijepolje, Priboj, Sabac. Our company also has the possibility of service branding according to the various needs of our partners and consumers.

PRODUCT

Our company is progressing more and more every day and trying to achieve the best possible success in terms of real healthy products. Following modern trends and the increasing need for healthy products, we have included organic raspberries in our offer, grown without the use of any pesticides. We are ready to respond to the increasing demand for organic products, so our capacities in the production and freezing of organic raspberries have reached 100tons. We have provided all the conditions so that we can pack and deliver products of this quality in all available and recommended packaging for this type of fruit on the market. Raspberry produced and certified in this way, of top quality, represents the safest and healthiest choice. Our strategic goal is to enable you to make that choice.
