

MAFI to Showcase Integrated Agri-Food Processing Excellence at SIAL Paris 2026

MAFI... Pioneering the Future of Food Innovation

Publication Date

15 September 2026

MAFI for Agricultural Produce Industries, A joint Egyptian–Emirati B2B agri-food venture in Sadat City, Egypt — 100% Export Oriented announces its participation in SIAL Paris 2026, where it will introduce its advanced manufacturing capabilities and diversified ingredient portfolio to international food and beverage manufacturers, distributors, retailers, blenders, private-label producers, and industry partners.

Located at **Hall 7 - Stand D 327**, MAFI will present one of the region's largest integrated agri-food processing complexes, bringing together five specialized factories within one integrated platform, ensuring maximum efficiency, reduced waste, and strong production synergy designed to serve international B2B markets.

Under our positioning "**MAFI... Pioneering the Future of Food Innovation**," MAFI combines advanced processing technologies, smart automation, sustainable sourcing, integrated quality control, and export-focused operations to deliver premium ingredients with consistent quality and reliable supply.

MAFI's portfolio includes premium citrus concentrates, NFC orange juice, orange cloudy concentrates, orange pulp cells, citrus oils and aroma essences, tomato & multi fruit concentrates, purées & pulps, IQF fruits and vegetables, and freeze-dried strawberries.

The portfolio serves beverage, dairy, bakery, confectionery, HORECA, private-label, frozen-food, food-processing, flavor, and fragrance manufacturers. Flexible bulk, foodservice, and retail packaging solutions support different customer specifications and market requirements.

At SIAL Paris 2026, MAFI will showcase key product categories including:

- Citrus Concentrates
- NFC Orange Juice
- Orange Cloudy Concentrate
- Orange Pulp Cells, Citrus Oils & Aroma Essences
- Tomato & Multi Fruit Concentrates
- Fruit Purées
- IQF Fruits & Vegetables
- Freeze-Dried Strawberry

MAFI's manufacturing complex incorporates advanced automation and smart operational systems, including optical sorting systems, X-ray devices, PLC and SCADA controls, AGV & automated material handling, shuttle racking systems, WMS warehouse management, and FIFO stock control, smart internal logistics and high speed packaging lines to enhance precision, hygiene, efficiency, and product consistency.

High-capacity production lines, flexible manufacturing, industrial refrigeration, robust cold-chain infrastructure, and more than 50,000 pallet positions of cold-storage capacity, Ammonia colling systems, steam boilers, cooling towers, air compressors, electrical networks, water treatment, industrial wastewater treatment, gas systems and transformers. All to support product integrity and reliable supply to customers across Europe, North America, the GCC, and other international markets.

MAFI applies chemical-free processing with no artificial additives, preservatives, or enhancement materials. Dedicated production zones, full quality control from raw material to

final shipment, hygienic design, and compliance with HACCP, BRC, ISO, FDA, and EU standards ensure premium export-grade products.

Sustainability is embedded across MAFI's value chain through efficient resource utilization, renewable-energy integration, water treatment, recyclable packaging, optimized use of agricultural raw materials, and responsible manufacturing practices.

Visitors to the MAFI stand will be able to explore the company's product portfolio, processing capabilities, quality systems, sustainability approach, and opportunities for long-term partnerships through dedicated product displays and meetings with MAFI's commercial and technical teams.

MAFI aims to become a trusted global agri-food processing and ingredient partner by combining premium quality, industrial scale, innovation, sustainability, reliable supply, and customer-focused solutions.

Meet MAFI's Team at Hall 7 - Stand D 327 to discover our premium ingredient portfolio, advanced processing capabilities, and opportunities for long-term partnership.
