ALMONDELI AT SIAL PARIS 2026

When Almonds Meet Cheese: Gourmet Pairings to Discover... and Taste!

Paris, October 17–21, 2026 — What if the next essential pairing around cheese were to be found not only in a wine cellar, but also in a fruit creation?

On the occasion of **SIAL Paris 2026**, Almondeli presents its new gourmet specialties and invites **food journalists, chefs, artisan cheesemakers and fine food professionals** to come and discover them at our stand — and, above all, to taste them.

SIAL 2026 NEW PRODUCT LAUNCH

Creations Designed to Enhance Farmhouse Cheeses

Almondeli revisits the great classics of cheese accompaniments such as **Chutney**, and **Quince Paste**.

The Pairing Is Told... But Above All, It Is Tasted

At Almondeli, we are convinced that a gourmet product should first and foremost be discovered through taste.

That is why we particularly invite **food journalists and media specializing in gastronomy** to come and meet us at SIAL.

Come taste our products, try our pairings with cheeses and speak directly with our team.

You will have the opportunity to discover:

- **Marcona Almonds**, with their sweet, buttery flavor and delicately crunchy texture.
- **Valencia Almonds**, available in a variety of flavored creations.
- **Fig Paste with Almonds, Date Paste with Walnuts and Apricot Paste with Almonds.**
- **Quince Paste**, a great classic revisited for new gastronomic pairings.
- **Other gourmet creations** developed for fine food retailers, restaurants and caterers.

A Taste Story Since 2008

Founded in **2008**, Almondeli develops specialties inspired by Mediterranean gastronomic heritage, combining **quality ingredients, know-how and creativity**.

Today, the brand offers a range designed for **fine food retailers, restaurants, caterers, cheesemongers and food professionals**.

PRESS APPOINTMENT — SIAL PARIS 2026

ALMONDELI — STAND 2R229

October 17–21, 2026

Paris Nord Villepinte

Food journalists: come and meet us and taste our new products!

Because a new gastronomic pairing should not only be described... it should be tasted.
