

Univest expands its ice cream packaging portfolio to 10 solutions

20 July 2026

Univest has expanded its ice cream packaging portfolio to 10 solutions, offering ice cream producers and foodservice businesses a broader selection of paper-based packaging and complementary products from a single supplier.

The expanded range includes paper cups and bowls for portioned ice cream, larger paper tubs, matching lids and wooden spoons. The solutions are designed for different product formats, serving sizes and consumption occasions, from individual takeaway desserts to family-size ice cream packaging.

The portfolio is available in a variety of sizes and can be customized with high-quality printing. This enables manufacturers to maintain consistent branding across several packaging formats while adapting the design to different product lines, seasonal collections and retail requirements.

The paper packaging is manufactured from certified raw materials and developed with a focus on food safety, functionality and responsible material use. Depending on the selected format, customers can choose packaging suitable for direct serving, takeaway, retail sales and product storage.

By increasing the range to 10 solutions and adding wooden spoons, Univest provides a more complete packaging offer for the ice cream industry. Customers can combine cups, tubs, lids and accessories within one portfolio, simplifying procurement, product development and logistics.

The expanded range is intended for ice cream manufacturers, cafés, dessert shops, foodservice operators, distributors and private-label brands seeking reliable and customizable packaging solutions.

About Univest

Univest is a European manufacturer of paper packaging for food and beverages. The company develops packaging solutions for ice cream, hot and cold drinks, takeaway food, retail and foodservice markets. Univest combines production expertise, certified materials and customization capabilities to support customers in Ukraine and international markets.
