● A FOUNDATION BUILT OVER DECADES

From AD roots to FD expertise

Founded in 1997, Linyi Tianqin Foodstuff Co., Ltd. was among China's early dehydrated-food manufacturers. We built our business on garlic, ginger and horseradish, developing the process discipline and export experience behind more than 2,000 metric tons of annual AD shipments.

In 2022, we brought this manufacturing foundation into freeze drying. Decades of production and management experience helped our FD operation reach stable, efficient commercial production quickly.

● FREEZE-DRIED CAPABILITY

Flexible forms. Reliable scale.

Our six freeze-drying chambers support a versatile fruit portfolio. A new production workshop is under construction, with total capacity planned to exceed eight chambers after expansion.
