

CardCube Group Enters the 2026 TRUSTECH INNOVATION AWARDS with GD09 RFID Silicone Wristband — Backed by 16 Years of RFID Manufacturing Excellence

PRESS RELEASE — 14 OCTOBER 2026 — PARIS / SHENZHEN

CardCube Group, one of the world's largest manufacturers of RFID custom products, has entered its newly launched GD09 RFID silicone wristband for the 2026 TRUSTECH INNOVATION AWARDS. The company will showcase the GD series and its full RFID portfolio at TRUSTECH 2026 in Paris this December.

Launched in 2025, the GD09 redefines the wearable ID tag with a breakthrough design: a 3D sculpted relief head, created through curved-surface engraving, delivers a tactile, high-impact look, while the ergonomic band ensures all-day comfort and breathability. Made of food-grade silicone that is waterproof, abrasion-resistant and hypoallergenic, it supports full customization — silk-screen, laser engraving and full-color printing — with Pantone-matched dual-tone colors. A patent application has been filed for its head design. Since launch, it has been showcased at IOTE Shenzhen 2025 and 2026, receiving strong positive feedback across events, venues, cultural-tourism sites and conferences.

Founded in 2010, CardCube Group has grown into a market leader for RFID smart cards, wristbands, keyfobs and custom products. With more than 600 staff, three factories covering 60,000 m² and exports to about 80 countries, the company provides one-stop service covering design, mold development, production, personalization and packing. Monthly output exceeds 30 million smart cards, 5 million wristbands and 8 million keyfobs, with custom production delivered in just 7–10 days.

The product range spans RFID/NFC smart cards (contactless, contact, magnetic-stripe, composite, metal and eco-friendly PLA/RPVC/wooden cards), silicone, PVC, fabric and disposable wristbands, keyfobs, epoxy tags, laundry tags and inlay sheets — backed by 120+ silicone and 180+ fabric wristband molds and an in-house mold factory for custom tooling.

CardCube products are trusted in major projects worldwide: FIFA World Cup Qatar 2022, Singapore Airlines membership cards, Iran and Spain metro tickets, Nigeria and Philippines voter cards, Kenya driving licenses and Genting Highlands, alongside long-term cooperation with hotel groups including Marriott, Hilton, Hyatt, Wyndham and IHG. Its hotel key cards work with leading lock systems such as Salto, Kaba, Vingcard, Onity and Saflok. The company has previously exhibited at TRUSTECH 2024 and RFID JOURNAL LIVE! 2024.

About CardCube Group: The largest manufacturer of RFID custom products, headquartered in Shenzhen, China, with an additional production base in Ningxia. For more information, visit www.cardcube.net / www.cardcube.tech or contact contact@cardcube.com.
