

# BUILD A REBEL BASE

Home is wherever a rebel lays their helmet. The Rebel Alliance is always on the run from the Empire, having to move on every time they're discovered. They are always on the lookout for their next base, so why not build them one?

## BUILDER'S TIP

Use tiles for the floor, to give a smooth look. Jumper plates allow you to easily move the minifigures around or rearrange the furniture.

Hey! You moved bases without telling me!

## AT HOME WITH THE REBELS

A Rebellion requires a nerve centre. Build machinery for a technical advantage over the enemy, but remember, an army marches on its stomach – so perhaps you should squeeze in a food station, too?

Can you imagine owning a landspeeder like Luke's and zipping around, just above the ground? Make it a reality by building the landspeeder of your dreams out of LEGO bricks. Will yours have an open top or closed cockpit? Will it be small and nimble or big enough for a family? The sky's the limit!

## GOOD TO GO

The base could be discovered by the Empire at any time. Build modular pieces that are easy to move, so the crew can pack up at a moment's notice and start again elsewhere.
