

Paper Cutouts for Decorating Pumpkins

Give your gourd a grin with these adorable facial features inspired by *The Happy Pumpkin*.

First, cut out each design with safety scissors. Then, using a glue stick or child-safe craft glue, add each piece to your pumpkin with a dab of glue to secure it. Add on extra details with acrylic paint or permanent markers to really help your pumpkin's personality shine through!

Older kids can also use these shapes as a template for pumpkin carving. Just tape on each piece where you'd like to position it, draw around the paper, and remove. With a grown-up, cut along the lines using your pumpkin carving tool. You'll have a jolly jack-o'-lantern in no time!
