

SPOT THE DIFFERENCE

These two pictures may look the same, but are slightly different! Look carefully and try to find the **six differences**.

FACTS ABOUT DEINONYCHUS

dye-NON-ee-cus

Deinonychus was about 3m (10ft) long, and weighed about as much as a large person.

Deinonychus was a carnivore, which meant it hunted other animals for food. Deinonychus means "terrible claw".

Deinonychus was covered in downy feathers and had razor-sharp teeth and deadly claws.
