The ongoing COVID-19 outbreak has the potential to impact every healthcare system across the globe. While the situation in China appears to be reaching a turning point, the World Health Organization (WHO) recently characterizes COVID-19 as a pandemic at the global level. Till Mar 18th, 191,127 confirmed, 7,807 deaths, 135 countries/territories/areas reported* globally. Europe has now become the epicenter of the pandemic, with more reported cases and deaths than the rest of the world combined, apart from China. The world must unite together and spare no effort to contain the virus. During this webcast, leading Chinese experts on COVID-19 and top global experts will share and discuss the latest scientific insights regarding COVID-19 disease development, as well as clinical experience in treating COVID-19 patients.
