## Vaccine Virtual Days 2021

Let science guide the way

Register today for Vaccine Virtual Days 2021  
Don't miss out; reserve your virtual seat at the table with vaccine experts

Register Now for Vaccine Virtual Days! 27–28 April 2021

Register now >

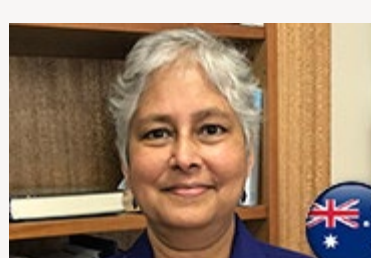

Dear Prof / Doctor / Dr

Vaccine Virtual Days are back! We are delighted to invite you to this global conversation. Join in on a scientific discourse that can help to improve and protect public health everywhere.

This is your chance to mix with the world's leading experts in vaccines. Don't hesitate to book your virtual seat today.

**Vaccine Virtual Days, 27–28 April: Register now!**

The 2021 Vaccine Virtual Days will connect you with the latest science. The agenda is brought to you by an independent Scientific Committee of world-leading vaccine experts, among others:

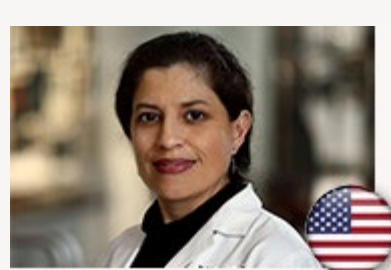

### Kanta Subbarao

Director of the WHO Collaborating Centre for Reference and Research on Influenza

### Flor de Maria Muñoz Rivas

Associate Professor of Pediatrics and Infectious Diseases at Baylor College of Medicine Director of Transplant Infectious Diseases at Texas Children's Hospital, Houston, Texas

### Mary Slack

Independent Consultant at Mary Slack Microbiology Consulting Ltd and Professor at Griffith University School of Medicine, Australia

### Emilie Karafillakis

Research Lead at the Vaccine Confidence Project, London School of Hygiene & Tropical Medicine

### Malik Peiris

Professor, Chair of Virology at the School of Public Health, University of Hong Kong, Division of Public Health Laboratory Sciences

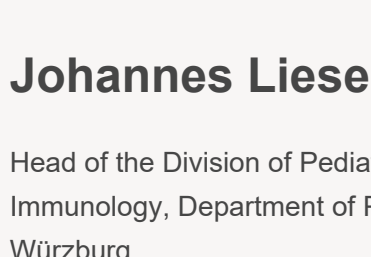

### LJ Tan

Chief Strategy Officer for the Immunization Action Coalition & Co-Chair, National Adult Immunization Summit and National Influenza Vaccine Summit

### Paolo Bonanni

Professor of Hygiene in the School of Human Health Sciences, Director of the Department of Health Sciences, University of Florence

### Johannes Liese

Head of the Division of Pediatric Infectiology and Immunology, Department of Pediatrics, University Hospital of Würzburg

The Scientific Committee have prioritised the most pressing topics, trends and needs in vaccinology:

- **The COVID-19 vaccine rollout experience, a world tour**
- **Adult vaccination: not another casualty of the pandemic**
- **Vaccine confidence**
- **UNICEF Immunisation agenda 2030: reach all for a lifetime**
- **The attributes of current and new vaccine technologies**
- **COVID-19: different perspectives**
- **A view into the future of infectious disease prevention**
- **Vaccine questions on your mind: ask the experts**

Plus, a live Q&A where experts answer your vaccine questions!

**Pre-submit a question to the panel and upvote questions posted by your peers!**

Don't miss your opportunity to meet with your global healthcare community – we hope to see you there.

**Visit the registration page to explore the full agenda and register for free, today! Vaccine Virtual Days 27–28 April 2021**

## The Faculty of Pharmaceutical Medicine of the Royal Colleges of Physicians of the UK has approved this event/course for Continuous Professional Development (CPD - 10 maximum)

All sessions will be available in English, Mandarin, Spanish, Italian, French, German, Portuguese and Russian live and on demand – including panel discussions where the Scientific Committee will answer your questions. You will be able to download a **Certificate of Attendance** after the event – all hosted on a virtual event platform accessible in English, Mandarin and Spanish, brought to you by GSK.
