Copy about Healthy Places for community health organisations, sharing with schools/early childhood services

Purpose: engage primary audience in the launch of Healthy Places

Optional email subject line: Introducing Healthy Places Healthy Futures

Introducing Healthy Places Healthy Futures

We're excited to introduce Healthy Places Healthy Futures.

Building on more than a decade of the Achievement Program, Healthy Places makes it easier to support health, wellbeing and learning in Victorian schools and early childhood services.

Healthy Places builds on the great work schools and services are already doing, providing a clear framework and practical action guides to identify achievable next steps.

Features and benefits

New and improved features to support health and wellbeing, include:

- the updated Healthy Places Framework
- new practical action guides
- ongoing tailored support from local health promotion practitioners
- refreshed tools to track your progress
- new recognition materials to celebrate progress

Health and wellbeing priority areas

Healthy Places supports a whole-school or whole-service approach across six priority areas:

- Food, Nutrition & Oral Health
- Physical Activity & Movement
- Mental Health & Wellbeing
- Smoking & Vaping
- Sun Protection
- Sustainability & Health

Healthy Places is free, and we encourage both returning members and new schools or services to explore the benefits.

Healthy Places is supported by the Victorian Government and Cancer Council Victoria and delivered locally by <Insert name of supporting organisation>.

To become a Healthy Places member, visit the new healthyplaces.health.vic.gov.au website or contact our team to discuss how we can support health and wellbeing in your school or service <Insert supporting organisation contact details>.
