A partnership between:

# Seeing Through the Haze

**Free, evidence-based, curriculum-aligned education resources for upper primary and secondary school students. Builds health literacy, critical thinking skills, protective behaviours and help-seeking strategies in young people.**

A range of learning activities can be chosen from modules:

## Getting the Facts

Provides students with the foundational knowledge and skills required to help them understand vaping and the many impacts on health.

## Seeing Through the Haze

Students understand how the marketing and advertising of vaping purposefully targets young people.

## Making Change

Students bring together their new knowledge to create a campaign for a smoke and vape-free future.

Educator support resources are available including teaching guides, flexible lesson cards, short professional learning videos and a school settings checklist.

Seeing Through the Haze has been developed in partnership with:
