

About the Institute

Technocrats Institute of Technology-CSE (TIT-CSE), Bhopal is formerly known as TIT-Advance, one of the premier Engineering Institutions of Central India, it is one of the oldest and largest college established in the year 2008. TIT-CSE was established under Pawan Tanay Shiksha Samiti. It is one of the 11 Institutes including Engineering Colleges of Technocrats Group, affiliated to Rajiv Gandhi Proudhyogiki Vishwavidyalaya and recognized by AICTE.

Technocrats Institute of Technology-Computer Science and Engineering provides global level of excellence in education to students from all over India, including those from the local and rural areas and instills high patterns of discipline, making our students technologically superior and ethically strong. It nurtures a holistic education approach that not only academically enriches the students, but also contributes to the students' personality by promoting innovation, creativity and practical work experience. It offers education to the student's in a conducive ambience created by enriched infrastructure and academic facilities. It practices and promotes high standards of professional ethics, transparency and accountability and ensures multifaceted development of students to make them industry ready.

About the Conference

The Advancements in Computational Intelligence Technologies (ICACIT 2025) will focus on topics of interest to computer and computational scientists and engineers. ICACIT 2025 is to bring together leading academics, scientists, research scholars and researchers to share and exchange their experience and research results about all aspects of Machine Learning & Data Science for Scientific and Industrial applications. It would also provide a premier interdisciplinary forum for researchers and educators to present the most recent innovations, trends, concerns, practical challenges encountered and the solution adopted in the field of computer science, Engg. & information technology. The conference aims to enhance the state-of-the-art in Advancements in Computational Technologies, as well as other emerging fields of computing, by innovative research discoveries and inventive solutions to tough information technology challenges and their industrial applications. Researchers, academicians, and professionals from around the globe are invited to submit original, unpublished research papers from all perspectives, including theory, practice, experimentations, and review papers that highlighting specific research domains for presentation during the conference's technical sessions.
