

Safety & Installation Guide  
**Wall-Mounted, Table and Floor Lamps**

**Bulb Requirements**  
(Region-Specific)

**USA & Canada**

E26 LED bulb only.  
Maximum 8W LED  
Not compatible with incandescent, halogen, CFL, or any high-heat bulbs

**EU & UK**

E14 LED bulb only  
Maximum 6W LED  
Not compatible with incandescent, halogen, CFL, or any high-heat bulbs

**Universal guidance**

LED bulbs only  
Never exceed the stated maximum wattage  
Use only bulbs from reputable manufacturers  
Ensure the bulb does not touch the shade or any part of the lamp

**Electrical Safety**

For indoor, dry-location use only  
Not suitable for bathrooms, humid rooms, or outdoor environments  
Connect only to a standard household outlet for your region  
Do not modify the plug, lampholder, wiring, or switch  
Keep cords untensioned and free from sharp edges or compression  
Keep away from flammable materials (curtains, bedding, insulation, foam)

If the lamp flickers, becomes unusually warm, emits odour, or behaves irregularly, unplug immediately.

**Wall-Mounted Lamps Installation**

Install by a competent adult  
Use suitable wall fixings for your wall type (brick, concrete, plasterboard, timber)  
Ensure the fixture is level, fully secure, and able to support its weight  
Do not mount on cracked, hollow, or unstable surfaces  
Ensure the cord hangs freely without strain  
Position where it cannot be pulled, knocked, or caught

**Table and Floor Lamps Placement**

Place on a flat, stable, heat-resistant surface.  
Keep cords clear of edges, drawers, pets, and foot traffic  
Position away from curtains, bedding, textiles, or flammable items  
Do not use inside cabinets or tight recesses without ventilation

**Operation**

Use only the correct LED bulb for your region  
Do not operate the lamp unattended for extended periods  
Ensure ventilation around the bulb and shade  
Do not cover the lamp or block airflow  
Keep out of reach of children and pets
