

VERRE D'ONGE

Verre d'Onge is a glass studio based in Montreal, specialized in decorative objects and high-end lighting. We are known for our unique frosted vase ensembles, available by custom order, as well as our different products developed for our collaborations or fabrication requests within the arts and design.

APPROACH

Jérémie St-Onge's work questions the ambivalence between decorative object and artwork. The uninhibited approach to his medium allows him to deepen the primary meaning of form. His practice, whilst respecting the traditions learned from masters, gives place for a more instinctive creative approach. When the craftsman is also an artist, there is space for spontaneity and nuances. Every piece has an unforeseen aspect that distinguishes singular from ordinary. These timeless vases celebrate the ancient technique that is handblown glass. This is not a production, but rather a large collection. The design is in the arrangement, the ensemble defines it.

CARE INSTRUCTIONS

Our signature frosted finish is finalized with a varnish. We don't recommend frequent manipulation or use with water. If needed, lightly wash with a damp microfiber cloth. Do not rub with an abrasive surface, soap, heat or fill with hot liquid. Do not clean in dishwasher. Handle with great care using fabric gloves or freshly cleaned hands.

For packing, we start with bagging individual pieces in a compostable bag, then bubble wrap. Pieces are then placed tightly in a first box with compostable peanut filling and ready to hand deliver to client. For shipping, the first box is placed in a second exterior box with filling between each side for maximum precaution.
