**ARIA
LIGHTING SERIES**

PRODUCT WARRANTY & INSPECTION GUIDE

WARRANTY AND SERVICE

All products include a 1-month replacement guarantee and free service. We encourage you to follow the inspection and connection steps outlined above to ensure eligibility for service or replacement.

If a product is returned with damage caused by incorrect wiring or installation, repairs and delivery coordination will be charged as per actuals.

INITIAL PRODUCT CHECK

We recommend checking that all parts listed in the Installation Manual are included in the product box. You may also refer to the digital installation manual for [Aria Linear light](#) and [Aria Ceiling light](#) , for a quick reference.

LED CONNECTION AND TESTING

Before installation, please review the Installation Manual for step-by-step testing and connection guidelines. Key points to ensure:

- The wiring from the ceiling (power outlet) must only connect to the input side of the driver.
- The LED Rod features a transparent wire with color-coded markings; Red (Positive +) and Black (Negative -). Connect the red wire to the red terminal and the black wire to the black terminal of the output side of the driver.

Do not reverse the connections or connect these to the input side of the driver. Doing so may damage the LED PCB.

Please note: Any alternate or unapproved wiring method may cause permanent damage and is not recommended.

CARE & HANDLING INSTRUCTIONS

The product is carefully crafted by master artisans and is produced in small batches, making it challenging, if not impossible, to create identical items. Therefore, any natural blemishes or irregularities should not be viewed as flaws. Production marks may include slight pour ripples or surface pitting that contribute to the uniqueness of each handmade piece.

Avoid exposing the product to water or moisture and always keep it in dry areas. To clean, gently wipe with a dry microfiber cloth as needed. It is recommended to wear gloves while handling the product to prevent fingerprint marks on the surface. Do not use any abrasive substances or cleaners. Please also be mindful of the product's weight and handle it with care.

Aluminum:

Over time, the metal surface may diminish its original luster. Avoid contact with water. For cleaning, use a thinner gently on the surface.

Blackened Aluminium:

This hand-patinated finish is achieved through controlled surface treatment. Please refrain from using any polish on the finish, as this may result in the removal of the patina.

Brass (Natural/Polished):

Over time, brass will gain a patina on its surface. To retain the original finish, use metal polish with a soft, dry cloth and gently rub it onto the surface.

Darkened Brass:

This hand-patinated finish is achieved through controlled surface treatment. Please refrain from using any polish on the finish, as this may result in the removal of the patina.
