

WOOD FINISHES

Our floating frames are available in two oak finishes, each offering a distinct character and aesthetic to complement the artwork.

01 — NATURAL OAK

The natural oak floating frame highlights the authentic beauty of the wood. Its warm, natural tones and visible grain create a timeless and understated finish, allowing the material to add warmth and character while complementing the artwork.

As with any natural wood, the oak may develop a slightly deeper and darker tone over time. This change is subtle and part of the natural ageing process of the material, adding character while maintaining the overall appearance of the frame.

Finish: Natural oak

Depth: 40 cm

02 — BLACK PAINTED OAK

The black painted oak frame combines the natural character of oak with a contemporary black finish. The deep, uniform colour creates a refined and sophisticated appearance, providing a strong contrast that enhances the artwork.

Finish: Black painted oak

Depth: 40 cm
