MATTHEW FAIRBANK DESIGN | WARRANTY & CARE INSTRUCTIONS

Matthew Fairbank warrants its furniture and lighting to be free from defects in workmanship and materials. Product carries a one (1) year warranty. This warranty does not apply to damage or breakage resulting from misuse, accidents, abuse, neglect, mishandling or wear resulting from normal use. Defective product will be repaired or replaced at Matthew Fairbank's discretion. This warranty does not cover defects in client's own material, fabric, leather or stone.

Many woods and metal finishes are applied by hand and may vary slightly in color, tone and overall character. Matthew Fairbank will make every effort to match a finish. However, no guarantee can be made of an exact match. Matthew Fairbank does not guarantee against fading and oxidizing. Variations in color and veining are inherent in stone, wood, and some leathers. All Matthew Fairbank furniture, lighting and objects are handmade and are therefore subject to variation.

Don't be afraid to use your MF pieces - that is what they're for! When you put fine furniture, lighting and objects into your home, give them the care they deserve. Regular attention and maintenance of fine works can ensure their beauty for years to come. Make sure to always use felt pads under articles that could cause discoloration or scratching, of the finished or lacquerd surfaces of your piece(s).

It is important to keep the home in which your furniture is placed properly humidified. Lack of humidity, usually in winter months or in dry climates, can cause certain veneers to crack and joints to work apart. Wood prefers a reasonable level of temperature and humidity (around 72 degrees with 40 percent humidity). Wood should not sit near heating or air conditioning registers. These remove necessary moisture from the wood and dry it out.

Wood is a natural product. Sun bleaching will occur when wood is exposed to sunlight. This can cause darker finishes to lighten and sometimes cause lighter finishes to darken. Some light bleaching can occur under both incandescent and fluorescent lighting.

Do not use any harsh abrasives, polishes or chemicals on your MF piece(s). Our brass is lacquered to prevent tarnishing; therefore, using a brass cleaner is not necessary. Our stone is sealed for stain resistance and wood is lacquerd to protect the finish stain. To maintain pieces, use a clean, soft cloth, to wipe any of the wood, glass, stone or brass elements. Apply Mineral Spirits to said cloth, (not directly onto the products surfaces). Do not over-saturate. Most glass cleaners will work on our glass and mirrors. Again, we recommend that these first be applied to a soft cloth, and not onto any product surfaces directly.

We're always happy to discuss any specific questions or concerns with you via the phone number and/or email address provided on our website at www.mfdnyc.com

Sincerely yours,

Matthew Fairbank
