HOW TO CARE

Our ***stainless steel*** furniture is crafted to last for generations. With simple, regular care, the surface will retain its beauty and character over time.

Daily Cleaning
- Wipe the surface with a soft microfiber cloth.
- Clean using warm water with a small amount of mild soap.
- Always dry the surface thoroughly with a clean, soft cloth to prevent water marks.

Fingerprints
Polished stainless steel may naturally show fingerprints. These can be easily removed with a dry microfiber cloth or a cloth slightly dampened with water.

Spills
Remove spills as soon as possible, especially acidic substances such as lemon juice, vinegar, wine, coffee or fruit juices. Prolonged contact may cause discoloration or affect the surface finish.

What to Avoid
- Abrasive sponges or scouring pads.
- Chlorine-based cleaners or bleach.
- Hydrochloric acid, muriatic acid or other strong acids.
- Cleaners containing chlorides.
- Steel wool or abrasive polishing compounds.
- Leaving water or cleaning products on the surface for extended periods.

Brushed Stainless Steel
Always clean and wipe in the direction of the grain to help maintain the original finish.

Polished Stainless Steel
Use only soft, non-abrasive cloths to preserve the reflective surface. Minor hairline scratches may develop over time as part of normal use.

Natural Character
Stainless steel is a living material. Small marks, subtle changes in appearance and a gentle patina are part of its natural ageing process and contribute to the unique character of each piece.

Thank you for choosing The Good Living & Co. Designed to be lived with for years to come.
