

Warehouse Inspection

This section outlines the procedures and forms used for conducting warehouse inspections to ensure compliance with food safety standards and operational efficiency.

3.3.1 Warehouse Inspection Form

A standardized form used to document the findings of warehouse inspections, including areas inspected, issues identified, and corrective actions taken.

3.3.2 Long-Term Storage Warehouse Inspection Form

A specialized form for inspecting long-term storage areas, focusing on the condition and safety of stored products over extended periods.

3.3.3 Warehouse Inspection Procedure

A detailed procedure outlining the steps to be followed during warehouse inspections, including preparation, execution, and follow-up actions.
