

Chief of Staff - Beyond Tomorrow (Stealth Mode)

Location: Remote

Reporting to: Julian Issa, Founder

Compensation: £45-60K + life-changing equity, with a direct path to COO and potentially co-founder status

About Beyond Tomorrow

Beyond Tomorrow exists to create a world where anyone can flourish. For us, that means capitalizing on two major megatrends, AI and longevity, to help build the infrastructure of the future.

We do this across four main verticals: media (podcasts & documentaries), summits, investing, and tools.

Where we're starting: The Beyond Tomorrow Podcast already reaches 100,000 listeners a month, and we'll be announcing a major joint venture in the coming weeks. Guests have included Peter Diamandis, Dave Asprey, Sophie Anne Trudeau, Dr. William Li, Emad Mostaque, and many more. We've built the best team in the podcast industry, hiring a roster of stars from all the major shows. We're nailing distribution with a slate of exciting plans to grow that reach even further. From that foundation, we'll move into tools, productization, and investment (SPVs) in the trillion-dollar opportunities set to revolutionize humanity.

Julian Issa, the founder, is at the forefront of longevity and AI. He hosts and speaks at all the major conferences in these spaces, including Superhuman, Davos during WEF, the AGI Conference, the Longevity Show, and many more.

The Role

This is as full a Chief of Staff role as you'll find. But it will also be the most rewarding role of your life. The opportunities are utterly endless. .

We are hiring only those who are genuinely obsessed with the megatrends of longevity and AI, and who are mission-aligned.

This role is for the generalist of generalists. It will be constantly evolving, with a direct path to COO and potentially even co-founding status.

You have to be on top of everything, and this really needs to be something you're obsessed with. You will receive a life-changing amount of equity in the business (realisable when you can exit).

What a Typical Day Could Look Like

No two days will be the same, but a typical day could involve:

- Working with our sponsors and managing those relationships

- Organising our summit guest list and running point on events
- Liaising with the leading voices in the AI field
- Brokering partnerships with longevity scientists
- Drafting financial models for investors
- Hosting Beyond Tomorrow events
- Keeping the founder's priorities, calendar, and commitments on track
- Building the systems and processes that let the company scale
- Jumping on whatever is most important that day, whether or not it's technically "your job"

Key Responsibilities

Operations & execution

- Own the day-to-day running of the business, keeping every workstream moving and nothing slipping through the cracks
- Build and improve the systems, processes, and tools that let a small team punch far above its weight
- Translate the founder's vision into operating reality and clear, actionable plans

Partnerships & relationships

- Broker and manage relationships with sponsors, scientists, investors, and the leading voices in AI and longevity
- Open doors at the highest level and represent Beyond Tomorrow with credibility and polish
- Manage the guest pipeline for the podcast and summits

Media & growth

- Support distribution and growth initiatives across the podcast and wider media
- Help bring the joint venture and future media plans to life

Investing & productization

- Draft financial models and supporting materials for investors
- Help build out the tools, products, and SPVs that turn our reach into real ownership and opportunity

Founder leverage

- Act as a true extension of the founder, anticipating needs and removing obstacles before they arise
- Prepare briefings, decks, and materials for conferences, investors, and partners
- Be the person who is always on top of it

Who You Are

- 3-6 years of experience in a fast-moving environment (startup, venture, consulting, operations, founder's office, or similar) where you've owned outcomes, not just tasks
- Ruthlessly organised and never drops a ball. You can hold a dozen workstreams in your head at once and always know what's next, what's blocked, and what matters most

-
- Personal growth obsessed: You must be working on yourself, seeking abundance in life and questioning how things have been done.
- Extreme ownership. When something needs doing, you find a way, whether or not it's technically your job. No task is too big or too small
- An exceptional communicator, in writing and in person. You can draft an investor email, brief a Nobel-calibre scientist, and rally a room with equal ease
- An owner, not an employee. You spot opportunities and risks before anyone asks, and you act on them
- Fast and resourceful. You're comfortable with ambiguity, you teach yourself whatever you need to know, and you'd rather ship and iterate than wait for perfect
- Impeccable judgement on who and what deserves our time, and the relationship skills to open doors at the highest level
- Genuinely obsessed with AI and longevity, the kind of person who reads, listens, and obsesses over this space for fun, not just for work
- Mission-driven, motivated by building a world where anyone can flourish

Nice to Have

- Experience in media, podcasting, events, or community building
- Exposure to venture, investing, or financial modelling
- An existing network in the AI and/or longevity worlds
- A track record of building something from scratch

What You'll Get

- A life-changing equity stake and a direct path to COO (potential co-founder status)
- A front-row seat to the people and ideas shaping the future of humanity
- The chance to build something from the ground up alongside a founder at the forefront of these fields
- Genuinely the most fun, varied, and meaningful work you'll ever do
