Raji Ibraheem

Multifaceted Tech Leader | Senior Software Engineer, Project Manager, & Product Manager

As a seasoned Senior Software Engineer with nearly a decade of coding experience, I specialize in developing innovative solutions that optimize efficiency, reduce costs, and drive revenue growth. Skilled in automation and marketing tools development, e-commerce, and ERP systems, I excel in leveraging Node.js, Laravel, and .NET technologies to deliver impactful results. With leadership roles at Overland Airways and Geeks for Growth, I have successfully led teams in implementing cutting-edge solutions. **Please explore my portfolio. [http://geekraji.com]**

PROJECTS

Sharreit (03/2023 - 05/2023)
- This platform, revolutionizes service sharing and cost-splitting. With Sharreit, users can seamlessly connect, collaborate, and save together, making life easier and more affordable

Overland Airways
- Led the development of the OverlandAirways Website, utilizing a Waterfall SDLC methodology. This project involved designing and implementing a robust online presence for Overland Airways. My leadership ensured the successful delivery of a visually appealing and functional website that serves as a valuable touchpoint for customers.

Retail Xpress
- RetailExpress is a comprehensive and dynamic solution designed to cater to the unique needs of shop owners, brand owners, and Super Admins. This versatile platform empowers businesses in the retail industry to thrive in today's competitive market landscape.
