

Photos for Initial Solar Design and Proposal

To help the installer size your solar system please provide the following photos. You can email them to gosolar@re-volv.org

1. 3 to 4 Photos of electrical service panel(s), utility meter, and surrounding area. Please provide a step back photo so we can see area around the panel and how high meter is.

a. Are there any markings in or near the electrical room to identify 240V, 208V, or 480V?

120/240 VOLTS

DANGER
208 VOLTS

277/480 VOLTS

2. A few photos showing the switchboard opened and a close view of all circuit breakers. Please make sure photos are clear and readable.

a. In your service panel are there breakers that are 3 positions wide?

3. Clear photo of label of electrical panel

4. Photos of roof (if accessible or visible from ground). If known, please provide type of roof, age, how many years are left and roof warranties or documentation/building plans

a. Roof material (composition shingles, metal roof, tile roof, flat roof)

Shingle Roof

Metal Roof

Tile Roof

Flat Roof
