Leica Viva TS11

Datasheet

Worx Viva

Simply productive surveying software

With clear graphics, non-technical terminology and simplified workflows SmartWorx Viva is incredibly easy to use.

- n Survey, coding and lineworks
- n Including full application package

Best-in-class Electronic Distance Measurement (EDM)

With PinPoint EDM, Viva TPS delivers the optimal balance of range, accuracy, reliability, beam visibility, laser dot size and measurement time.

- n 1 mm + 1.5 ppm to prism
- n 2 mm + 2 ppm to any surface
- n 1000 m range without a prism

Leica Viva Smart Station Add-on

Add full GNSS functionality to your Viva TS11 whenever you want and combine TPS and GNSS in the most efficient way.

n Use SmartStation for TPS setup without the need of control points, traverses and resections

Legend

- 1 Standard deviation ISO-17123-3
- ² Overcast, no haze, visibility about 40 km; no heat shimmer
- ³ Standard deviation ISO-17123-4
- 4 Fast Mode
- Under optimal conditions on Kodak Grey Card (90% reflective). Maximum range varies with atmospheric conditions, target reflectivity and surface structure.
- ⁶ Range > 500m, 4 mm + 2 ppm
- ⁷ Single Measurement every 30 second by 25° C. Battery time may be shorter if battery is not new.
- 8 Reflectorless measurement time may vary according to measuring objects, observation situations and environmental conditions.
- Measurement precision, accuracy and reliability are dependent upon various factors including number of satellites, geometry, obstructions, observation time, ephemeris accuracy, ionospheric conditions, multipath etc. Figures quoted assume normal to favorable conditions. Times can also not be quoted exactly. Times required are dependent upon various factors including number of satellites, geometry, ionospheric conditions, multipath etc. The following accuracies, given as root mean square, are based on real-time measurements.
- When used within reference station networks the position accuracy is in accordance with the accuracy specifications provided by the reference station network.

Whether you want to stake-out an object on a construction site or you need accurate measurements of a tunnel or a bridge; whether you want to determine the area of a parcel of land or need the position of a power pole or to capture objects for as-built maps – you need reliable and precise data.

Leica Viva combines a wide range of innovative products designed to meet the daily challenges for all positioning tasks. The simple yet powerful and versatile Leica Viva hardware and software innovations are redefining state-of-the-art technology to deliver maximum performance and productivity. Leica Viva gives you the inspiration to make your ambitious visions come true.

When it has to be right.

Total Quality Management – our commitment to total customer satisfaction.

Distance meter (Prism):

Laser class 1 in accordance with IEC 60825-1 resp. EN 60825-1
